2. One of our income generating properties is the subject matter of legal proceedings and the outcome thereof may have a material adverse effect on the business, reputation and results of operations of our Company.

We earn rental income from properties we own within a building named Shradha House located at Plot No. 345, House No. 847, Kingsway, Mohannagar Nagpur – 440001. An Appeal dated June 07, 2007 bearing No. 454/2004 has been filed by (1) Union of India in the Ministry of Defence, New Delhi; (2) Defence Estate Officer, Mumbai and (3) Commanding Officer, 118 Infantry Battalion, Fort, Nagpur ("Appellants") against M/s Kalpana Enterprises ("Respondent") before the High Court of Judicature at Bombay, Nagpur Bench, Nagpur ("the Court") with respect to the land bearing Survey No. 345, Ward No. 65, Mouza Sitabuldi, Nagpur area admeasuring 6084.7 sq.mtrs ("the Property") on which the Company has developed the building Shradha House and in which the Company owns certain units. The Property was originally owned by one George Duncan, Superintendent in the Public Works Department under the British Empire and he had created a mortgage on the same in favour of Gangadharrao Chitnavis. On default in repayment of the loan, Gangadharrao Chitnavis came to acquire ownership of the said Property. Further, Ganadharrao Chitnavis, being a partner of the partnership firm M/s. Kalpana Enterprises utilized the Property for the purpose of carrying out the Respondent's business activities. The Appellants laid claim to the said Property on the grounds that the Property did not belong to George Duncan as he was a government servant who was purely allotted residential quarters and did not own the Property and that the same fell within the defence area of Union of India. The Appellants initiated legal proceedings in respect of the above claim. Vide the last Order dated February 04, 2004, passed in furtherance of the above legal proceedings and appeals, the appropriate court inter-alia held the Respondent to be the owner of the Property. Thereafter, the Appellants filed the above Appeal dated June 07, 2004 bearing No. 454/2004 before the Court inter-alia praying that the Court set aside the Order dated February 04, 2004. This matter is pending before the Court as on the date of filing this Prospectus. Any adverse order in the aforesaid matter that may be passed against M/s Kalpana Enterprises may adversely affect the title of the Company to the Property. This may intern have material adverse effect on the business, reputation and results of operations of our Company.

3. We require certain approvals and licenses in the ordinary course of business and are required to comply with certain rules and regulations to operate our business, and the failure to obtain, retain and renew such approvals and licences or comply with such rules and regulations, and the failure to obtain or retain them in a timely manner or at all may adversely affect our operations.

We require several statutory and regulatory permits, licenses and approvals to operate our business, some of which our Company has either received, applied for or is in the process of application. Many of these approvals are granted for fixed periods of time and need renewal from time to time. Non-renewal of the said permits and licenses would adversely affect our Company's operations, thereby having a material adverse effect on our business, results of operations and financial condition. There can be no assurance that the relevant authorities will issue any of such permits or approvals in the time-frame anticipated by us or at all. Further, some of our permits, licenses and approvals are subject to several conditions and we cannot provide any assurance that we will be able to continuously meet such conditions or be able to prove compliance with such conditions to the statutory authorities, which may lead to the cancellation, revocation or suspension of relevant permits, licenses or approvals. Any failure by us to apply in time, to renew, maintain or obtain the required permits, licenses or approvals, or the cancellation, suspension or revocation of any of the permits, licenses or approvals may result in the interruption of our operations and may have a material adverse effect on the business. If we fail to comply with all applicable regulations or if the regulations governing our business or their implementation change, we may incur increased costs, be subject to penalties or suffer a disruption in our business activities, any of which could adversely affect our results of operations. For further details, please see chapters titled "Key Industry Regulations and Policies" and "Government and Other Statutory Approvals" at pages 94 and 206 respectively of this Prospectus.

4. One of our group companies Shradha Industries Limited is on Dissemination Board of BSE and is in the process of complying with the relevant statutory requirements. An adverse development w.r.t same could have a material impact on our group's goodwill and reputation.

Shradha Industries Limited (one of our group companies) had listed its equity shares *vide* OTC issue in 1995. OTCEI listed companies were put up on Dissemination Board. Consequently SIL has made an application dated February 01, 2017 to BSE to list its equity shares on Metropolitan Stock Exchange of India Limited (MSEI), which is the nationwide Stock Exchange, for which it has submitted listing application dated January 19, 2017 on MSEI and the process for the listing is being followed up.

Further, there are presently no orders from SEBI or any regulatory authority which prohibit SIL, its directors, its promoters and the companies which are promoted by any of them from buying, selling or otherwise dealing in /associating with the securities market, in relation to the aforesaid matter or any other matter. However; SEBI, might take action against Exclusively Listed Companies and its Promoters / Directors pending Exit Offer to the Shareholders of listed companies or pending listing on recognized stock exchanges at any time. In case such specific order or action is taken it could affect our group's goodwill as well as our Company's to access the securities market / ability to raise capital in the future.

5. We may be unable to protect our rights in respect of some of our core income generating properties

Under the provisions of a Development Agreement dated 29th June, 2000 ("the DA") made between the Company and M/s. Kalpana Enterprises being the owner of land bearing Plot No.345, Mouze Sitabuldi, Nagpur, the Company had developed the aforesaid plot by constructing a building being a Commercial Complex known as 'Shradha House' on the aforesaid plot. By a Deed of Declaration dated 26th July, 2002 ("the Deed") registered with the office of the Joint Sub-Registrar, Nagpur-2 on 30th July, 2002, made by M/s.Kalpana Enterprises which owned the property bearing Plot No.345, admeasuring about 1,958.22 sq. mtrs. involved in 4896.29 sq. mtrs. (i.e.52,684 sq. ft.) of F.S.I. being the portion of entire Khasra No.347, Municipal Ward No.65, Mouza Sitabuldi, City Survey No.2414, sheet No.247/46, Circle No.23, within the limits of Nagpur Municipal Corporation, Nagpur Tah. & Dist. Nagpur on which, the apartment scheme known as "Shradha House" ("the Property") was constructed, the entire Property was submitted to the provisions of the Maharashtra Apartment Ownership Act, 1970. In terms of the said Declaration, 43 units in the said building having varied built-up area aggregating to 4896.29 sq. mtrs. were submitted under the Maharashtra Apartment Ownership Act, 1970. Each of the said apartment owners have corresponding undivided percentage in the land on which the said building Shradha House is constructed in proportion to the built-up area of each of the unit. Certain units of Shradha House remained unsold to third parties and were retained by the Company after payment of due consideration to the land owner, Kalpana Enterprises. The Company has currently entered into leave and license/renting arrangements in respect of these units with third parties. The deeds of apartment in respect of the above units held by company were duly executed; however the records of the same being old have not been properly maintained by the company. We have had undisputed possession and ownerhip of these units for over a decade and we believe that there exists a clear title on this; however since these documents are not readily available; there exists a risk on out ability to document/prove our clear title to that extent.

6. Introduction of Real Estate (Regulation and Development) Act, 2016 (RERA) may impact real estate prices and inability to comply with the provisions of RERA may subject us to penal consequences.

A new page in the history of Indian real estate sector was created with the implementation of the Real Estate (Regulation and Development) Act, 2016, (RERA) on May 1, 2017. Each state and union territory will now have its own Regulatory Authority (RA) that will frame rules and regulations in tandem with the Act. As per the Act, all the projects will now be sold based on carpet area and not the super-built-up area. The key aspect that needs to be addressed, is the fact that operating costs for the real estate industry may go up while demand may continue to rationalise to the extent where potential purchasers refuse to (or are unable to) pay beyond a certain price. Such circumstances can have an impact on our financial conditions and results of operation. Further Failure to comply with the provisions of RERA Act subjects us to penalties upto 10% of the project costs and/or imprisonment.

7. Delays in our proposed development of project – "Victoria – II" could materially adversely affect our results of operations and financial conditions.

Our proposed investment (which is being made from the net proceeds of the Issue) in Suntech Infraestate Nagpur Private Limited are being primarily used to finance the construction expenses of the project – Victoria II located at Nagpur. For further details of such project and its business plan please see "Objects of the Issue" and "Our

Business" beginning on page no. 62 and 83 of this Prospectus. While the land acquisition, land excavation activities are almost completed; full-fledged construction work has not yet been started on this site and there is a delay in this project from the management's original plan. Suntech Infraestate Nagpur Private Limitedhas obtained a commencement certificate dated August 22, 2014 and the Building Plan Approvals etc., which commencement certificate is valid for a period of 4 (four) years and requires yearly renewal in case of work as specified in the said certificate not being commenced within 1 (one) year from the date of issue of the said certificate. The work in the project has started within the period of 1 (one) year of the date of the commencement certificate and accordingly, no renewal of the same is required to be obtained by Suntech Infraestate Nagpur Private Limited. However, if Suntech Infraestate Nagpur Private Limiteddoes not complete the work as specified under the commencement certificate within the aforesaid period of 4 (four) years, it will be required to obtain a fresh commencement certificate to continue the commencement work. Further, our management will take the requisite decisions in respect of obtainment of further approvals required for full-fledged construction once land leveling and financial fund availability matters are closed. Considering our group's past track record of developing real estate projects, we believe that we should be able to obtain necessary approvals in due course at the relevant time. However, our inability to take such approvals on time or execute the project as per our estimated timelines could lead to cost overruns as well as render the project economically un-viable in the future. Any such material adverse development with respect to this project and its execution would materially adversely affect our consolidated financial results and financial condition. For further details of our cost of project and status of project please refer to "Objects of the Issue" and "Our Business" beginning on page no. 62 and 83 of this Draft Prospectus.

8. Our revenues and profits are difficult to predict and can vary significantly from period to period.

We derive our revenues and profits primarily from the sale of residential and commercial properties and the leasing of commercial properties. While income from our present lease arrangements may be relatively stable, revenues from sales are dependent on various factors such as the size of our developments, competition, demand for our developments in the regions we operate in, the rights of third parties, receipt of approvals from governmental authorities and general market conditions. Further as on date our company on a standalone basis is not developing any real estate project. However on a consolidated basis we are developing real estate projects through our associate company (which will become our subsidiary post this IPO) and have recently completed construction of project in our subsidiary company

There could be a case where in a particular period we do not sell any of our inventories and hence our results for such period may not be comparable with another past or subsequent period.

Further, our revenues and profits from the Development Business are also determined by the extent to which they qualify for revenue recognition under the percentage of completion method, or the "POC Method", in accordance with our accounting policies as well as the relevant accounting standards issued by the ICAI. Under the POC Method, our revenue from sales depends upon the volume of bookings we are able to obtain for our developments and the timing of such revenue recognition depends on achieving a certain threshold of completion of our projects. Our bookings depend upon our ability to identify suitable types of developments that will meet customer preferences and market trends, and to market our projects. Further, our ability to recognize revenue and profits also depends on our customers paying us the remaining amounts due under contract, after the payment of initial deposit.

The POC Method is applicable to developments that we intend to sell and is not applicable to developments that we intend to lease. Accordingly, for projects to which the POC Method of revenue recognition is applicable, the extent to which we can recognize revenues is also dependent on the volume of sales. Further, we recognize revenues based on estimated costs. We cannot assure you that these estimates will not require further adjustments based on the actual cost incurred with respect to a particular project. The effect of such changes to estimates is recognized in the financial statements of the period in which such changes are determined. This may lead to significant fluctuations in revenue recognition.

The rate of construction progress depends on various factors, including the availability of labour and raw materials, the prompt receipt of regulatory clearances, access to utilities such as electricity and water, and the absence of contingencies such as litigation and adverse weather conditions. These factors may cause significant fluctuations in our revenues from period to period. A combination of the factors discussed above may result in significant variations in our revenues and profits, and our financial position in a particular period may not accurately reflect our level of activity in that period. Similarly, our level of activity for a particular period may not accurately reflect our financial position in that period. Therefore, we believe that period-to-period comparisons of our results of operations are not necessarily meaningful and should not be relied upon as indicative of our future performance. If in the future our results of operations are below market expectations, the price of our Equity Shares could decline.

9. The land proposed to be acquired by our Company under the Objects of the Issue, has not yet been identified.

We are a real estate development company, engaged in the business of development and sale of residential as well as commercial properties (the "Development Business") and the development and leasing of commercial properties (the "Lease Business"). As part of our Objects of the Issue, we propose to acquire land or land development rights primarily in the Nagpur and / or Pune and have earmarked an amount of ₹ 150.00 lakhs for the same which represents 10.05% of the Fresh Issue. For further details please refer to the chapter titled "Objects of the Issue" beginning on page no. 62 of this Prospectus. However, our Company has not yet identified any land in the proposed areas.

Costs of acquiring land or land development rights will vary depending on various factors, such as, location of land in prime areas or otherwise, profile of the population in the surrounding areas, type of project that can be developed, general economic conditions and the extent of negotiations between us and the parties from whom we propose to acquire land. Inability to identify a suitable land meeting our ctiteria or within the earmarked budget or at all may impact our future business operations, strategies and business outlook. Also, in case of any delay, we may be subject to risks on account of appreciation in land prices and thus our estimated budget may not be adequate for the purchase. This may require us to infuse for capital from our internal accruals and / or from borrowed funds, both of which may impact our day-to-day working capital needs and financing costs respectively, thus adversely affecting our financial situation and results.

10. Our Company has allotted Equity Shares during the preceding one year from the date of the Prospectus at a price which is lower than the Issue Price.

Our Company has allotted the following Equity Shares during the preceding one year from the date of the Prospectus at a price which is lower than the Issue Price:

Date of Allotment	Name of the Allottee	Number of Shares	Issue Price (₹)	Reasons
August 24, 2017	All Shareholders of the	72,21,700 Nil	Bonus	
	Company as on that date	72,21,700	IVII	Allotment

11. Our Company has reported certain negative cash flows from its operating activity, investing activity and financing activities in the past, details of which are given below. Sustained negative cash flow could impact our growth and business.

Our Company had reported certain negative cash flows from our operating activities, investing activities and financing activities in the previous years / periods as per the standalone restated financial statements and the same are summarized as under:

(₹in lakhs)

Particulars	June 30,	For the year ended March 31,				
Faruculars	2017	2017	2016	2015	2014	2013
Cash flow from Operating Activities	(64.34)	476.58	1,391.07	(852.69)	220.50	(527.14)
Cash flow from Investing Activities	35.89	220.28	70.76	445.59	(111.07)	457.07
Cash flow from Financing Activities	(0.43)	(1.89)	(308.53)	298.46	(23.01)	12.83
Net increase / (decrease) in cash and cash equivalents	(28.88)	694.97	1,153.31	(108.62)	86.41	(57.24)

Cash flow of a company is a key indicator to show the extent of cash generated from operations to meet capital expenditure, pay dividends, repay loans and make new investments without raising finance from external resources. If our Company is not able to generate sufficient cash flows, it may adversely affect our business and financial operations.

12. Our Lease Income is dependent on our ability to enter into new leases, or renew existing leases, on favourable terms and the willingness and ability of our tenants to pay rent at suitable levels from our single income generating units within one property – namely – Shradha House.

We earn majority lease income from units within our main property – Shradha House. The same is leased to private parties including large companies such as Idea Cellular; Srei Group etc. as as well as certain Educational Institutions and Colleges operated under the brand of "Raisoni Group of Institutions". Our property(s) may suffer from a lack of demand due to the prevailing market conditions and we may not be able to find suitable tenants if any of these tenants decide to preclose our rental arrangements. We cannot assure you that we will be able to

conclude lease deeds or other form of definitive agreements with tenants for Shradha House in a timely manner and on satisfactory terms, or at all. In addition, our customers may choose to acquire or develop their own commercial or retail facilities, which may further reduce the demand for our property.

We have historically targeted, and will continue to target, large multinational and Indian corporates and retailers. Our growth and success will therefore depend on the provision of high quality office and retail space to attract and retain tenants who are willing and able to pay rent at suitable levels and on our ability to anticipate the future needs and expansion plans of these tenants. Further, we may not be able to re-let or renew lease contracts promptly, or the amount of rent and the terms on which lease renewals and new leases are agreed may be less favourable than those in the current leases.

13. Certain information contained in this Prospectus is based on management estimates and we cannot assure you of completeness or accuracy of the data.

Certain information contained in this Prospectus like data on our funding requirements and our proposed use of issue proceeds is based solely on management estimates and has not been appraised by any bank or financial institution. The estimated project dates as well as costs may change depending on the circumstances like changes in laws and regulations, competition, irregularities, ability of the third parties to complete their services, delays cost overruns or modifications to our ongoing projects. Such circumstances can have an impact on our financial conditions and results of operation.

14. Our business is dependent on the performance of the real estate market in the regions in which we operate, and fluctuations in market conditions may adversely affect our ability to sell or lease our real estate developments at expected prices.

Our business is dependent on the performance of the real estate market in the regions in which we operate, and could be adversely affected if market conditions deteriorate. Real estate projects take a substantial amount of time to develop, and we could incur losses if we purchase land at high prices and we have to sell or lease our developed projects during weaker economic periods. Further, the market for property can be relatively illiquid, and there may be high transaction costs as well as insufficient demand for property at the expected lease payment or sale price, as the case may be, which may limit our ability to respond promptly to market events. The demand for real estate is significantly affected by factors such as the existing supply of developed properties in the market as well as the absorption rate for lease assets, which factors are in turn influenced by changes in government policies, regulatory framework, environmental approvals, litigation, economic conditions, demographic trends, employment and income levels and interest rates, among other factors. These factors can adversely affect the demand for and the valuation of our completed developments (which have not been either sold or leased), Projects under Construction and our Planned Projects and, as a result, may materially and adversely affect our financial condition, results of operations, cash flows, our ability to service our debt and the trading price of our Equity Shares.

15. We face intense competition in our business and may not be able to compete effectively, particularly in regional markets where we may not have significant experience.

We operate in highly competitive markets. Competition in these markets is based primarily on the availability and the cost of land as well as the ability to execute projects within the required time. We face competition from real estate companies in India bidding for new and similar property development projects, as well as government bodies such as urban development authorities that are in the business of real estate development. Given the fragmented nature of the real estate development industry, we often do not have adequate information about the projects our competitors are developing and accordingly, we run the risk of incorrectly estimating demand, supply and pricing in the market.

Certain of our competitors may be better known in certain regional markets, have more experience in undertaking real estate development in these markets and be better placed to acquire land for new property development projects in these markets. We may not possess the same level of knowledge and understanding in the development, ownership and management of properties in these markets as we do in our core markets. We may need to take certain steps to address these risks, including adjusting our designs and development methods, establishing business relations with local land owners and joint venture partners, obtaining raw materials and labour on acceptable terms, understanding the requirements of the local laws and understanding market practice and requirements of potential customers. We cannot assure you that we will be able to successfully implement all the

steps required to address these risks, which could adversely affect our results of operations and financial condition.

We cannot assure you that we will be able to compete effectively with our competitors in the future, and our failure to compete effectively may materially and adversely affect our business, financial condition and results of operations. We and our developments must also compete with an increasing number of commercial real estate developers and existing commercial developments that may be available for lease. Increasing competition could result in price and supply volatility, which could cause our business to suffer.

16. Failure to procure contiguous parcels of land may adversely affect our business, results of operations, financial condition and prospects.

In the ordinary course of our business, we seek to enter into arrangements with land owners to procure land parcels to form a contiguous land mass, upon which we undertake construction and development of properties. Our ability to acquire suitable sites is dependent on a number of factors that may be beyond our control, including the availability of suitable land, the willingness of landowners to sell land to us on commercially acceptable terms, the ability to obtain an agreement to purchase from all the owners where land has multiple owners, the availability and cost of financing, encumbrances on targeted land, government directives on land use, changes in government policies and the receipt of permits and approvals for land acquisition and development. We cannot assure you that we will be able to procure such parcels of land or enter into suitable arrangements to form a contiguous mass on terms that are acceptable to us, or at all. This may cause us to modify, delay or abandon future development projects resulting in our failure to realize our investments, which in turn could materially and adversely affect our business, results of operations, financial condition and prospects.

17. Our standalone financial results could be materially affected due to changes in prices of our inventories or assets.

As on June 30 2017, our company is not undergoing construction on any project directly (i.e. standalone basis). Our subsidiary company would be developing project. Hence, until we launch or start a new project in our company; on a standalone basis, our incomes would come from rentals as well as from sale of unsold inventory or from sale and purchase of other real estate. Hence our standalone results could be materially affected due to changes in value of these inventories.

18. We may not be successful in identifying suitable land parcels for development, or develop saleable or leasable properties, or anticipate and respond to customer demand in a timely manner.

Our ability to identify suitable parcels of land for our development activities is fundamental to our business and involves certain risks, including those related to identifying appropriate land and formulating development plans that appeal to the tastes of our customers, understanding and responding to the requirements of commercial tenants and anticipating the changing retail trends in India. Our decision to acquire land and undertake a project involves an assessment of the size and location of the land, the preferences of potential customers, the economic potential of the region, the proximity of the land to civic amenities and supporting infrastructure, the willingness of landowners to sell the land to us on terms which are commercially acceptable to us, the ability to enter into an agreement to buy land from multiple owners, the availability and cost of financing such acquisitions, the availability and competence of third parties such as architects, surveyors, engineers and contractors, the existence of encumbrances, government directives on land use, and the ability to obtain permits and approvals for land acquisition and development.

While we have in the past successfully identified suitable projects that meet market demand, we may not be as successful in the future. The failure to identify suitable projects, build or develop saleable or leasable properties or meet customer demand in a timely manner may cause us to change, delay or abandon entire projects, which in turn could materially and adversely affect our competitive position, business, financial condition, results of operations and prospects.

19. The success of our residential developments is dependent on our ability to anticipate and respond to customer requirements.

The growing disposable income of India's middle and upper income classes, together with changes in lifestyle, has resulted in a substantial change in the nature of their demands. Increasingly, customers are seeking better housing and better amenities in new residential developments. Our focus on the development of high quality luxury residential accommodation requires us to satisfy these demanding consumer expectations. The sort of amenities

now demanded by consumers include those that have historically been uncommon in India's residential real estate market such as 24-hour electricity, power back-up, running water and amenities such as security, parking, waste disposal and management, janitorial services, landscaped gardens, playgrounds, swimming pools, fitness centers, tennis courts and golf courses. Given the current global economic crisis, we face an increasing pressure to service our customers commensurate to their expectations at attractive prices, which may not be profitable to us. Consequently, our inability to meet our customers' preferences or our failure to anticipate and respond to customer needs could materially and adversely affect our business and results of operations. If we fail to anticipate and respond to customer requirements, we could lose potential customers to competitors, which in turn could adversely affect our business, results of operations, financial condition and prospects.

20. The unavailability of raw material, fuel and labour, or an increase in their costs, may adversely affect our results of operations.

Our business is affected by the availability, cost and quality of the raw materials, fuel and labour that our contractors require to construct and develop our properties. Our principal raw materials include steel, cement, glass and plastics. The prices and supply of these and other raw materials depend on factors not under our control, including general economic conditions, competition, production levels, transportation costs and import duties. The domestic prices of raw materials such as steel and cement have remained volatile in the past three years. The unavailability of, or a significant increase in the price of, fuel may also result in an increase in price of raw materials and construction. The unavailability of, or a significant increase in costs of, labour also affects our business adversely. We cannot assure you that we would be able to procure raw materials and labour in a timely manner and at competitive prices or that we will not be affected in the event of any shortfall of supply, which may adversely affect our business and results of operations.

21. Most of our projects require the services of third parties, which entails certain risks.

Most of our projects require the services of third parties. These third parties include contractors, architects, engineers and surveyors. The timing and quality of construction of the projects we develop depends on the availability and skill of those third parties, as well as contingencies affecting them, including labour and raw material shortages and industrial action such as strikes and lockouts. We cannot assure you that skilled third parties will continue to be available at reasonable rates and in the areas in which we conduct our projects. As a result, we may be required to make additional investments or provide additional services to ensure the adequate performance and delivery of contracted services and any delay in project execution could adversely affect our profitability.

We have outsourced, and may in the future continue to outsource, construction related activities. This, we believe, enables our management to focus on our core activity of real estate development and leasing. If the contractors and other service providers fail to perform their respective obligations satisfactorily with regard to a project, we may be unable to develop the project within the intended timeframe, at the intended cost, or at all. In such circumstances, we may be required to incur additional cost or time to develop the property to the appropriate standard of quality and in a manner consistent with our development objective, which could result in reduced profits or, in some cases, significant losses. We may also not be able to recover compensation for any resulting defective works or materials. While we believe that we have adequate contractual safeguards in this regard, we cannot assure you that the services rendered by any of our independent construction contractors will always be satisfactory or match our requirements for quality.

22. There may be potential conflict of interests between our company and other venture or enterprises promoted by our promoters or directors.

Our promoters have varied business interests in other sectors including real estate. They regurlarly invest in properties, land etc through other ventures or in personal capacity. We have not signed any Non-Compete agreement with our promoter group and hence there exists a potential conflit of interest with the ventures or business interests of our promoters group within the real estate sector.

For further details, please refer to the chapters titled 'Business Overview', 'Our Group Companies', beginning on page nos. 83 and 127, respectively and "Annexure XXIII - Related Party Transactions" under section titled "Financial Statements" beginning on page no. 176 of this Prospectus.

23. We conduct due diligence and assessment exercises prior to acquisition of land for undertaking development, but we may not be able to assess or identify certain risks and liabilities.

We constantly acquire land or development rights for our business and investment purposes. We internally assess and conduct due diligence exercise through external consultants to assess the title of the land and preparation of feasibility reports to assess its financial viability. This assessment process is based on information that is available or accessible by us / our consultants. There can be no assurance that such information is accurate, complete or current. Any decision based on inaccurate, incomplete or out-dated information may result in risks and liabilities associated with such projects. This may adversely affect our business, financial condition and results of operations. We have in the past been subject to land title related litigations post acquisition of lands and there is no assurance that we will be able to main dispute free assets in the future. For details regarding our land related litigations, please see "Outstanding Litigations and Material Developments" beginning on page no. 198 of this Prospectus.

24. Our operations have been concentrated in the State of Maharashtra in India. Our growth strategy to expand into new geographic areas poses risks. We may not be able to successfully manage some or all of such risks, which may have a material adverse effect on our revenues, profits and financial condition.

Our operations have been geographically concentrated in the State of Maharashtra. Our business is therefore significantly dependent on the general economic condition and activity in the State in which we operate, and the central, state and local Government policies relating to real estate development projects, especially meant for leasing. Although investment in such sector in the areas in which we operate has been encouraged, there can be no assurance that this will continue.

We may expand geographically, and may not gain acceptance or be able to take advantage of any expansion opportunities outside our current markets. This may place us at a competitive disadvantage and limit our growth opportunities. We may face additional risks if we undertake projects in other geographic areas in which we do not possess the same level of familiarity as competitors.

25. One of our group companies has incurred losses in the past.

One of our group companies has incurred losses in one of the past three years:

(₹in lakhs)

Name of Crown Company	Profit / (Loss) after Tax			
Name of Group Company	March 31, 2017	March 31, 2016	March 31, 2015	
Suntech Infraestate Nagpur Private Limited	0.07	0.04	(2.65)	

Losses in the future by these companies may further erode their net worth and hence this may affect our promoters investment value and hence adversely affect their financial conditions and goodwill.

26. We have not made any provisions for decline in value of our Investments.

As on June 30, 2017, we have made investments in Unquoted Equity Instruments aggregating to ₹ 207.14 lakhs, as per Restated Standalone Financial Statements. These investments are mainly into equity shares of subsidiary, associate companies and others. These subsidiary or associate companies are land owning companies and the associate company does not have operational profits yet. Since we believe that these investments are held for a long term and benefits from such investments may accrue in the future, we have not made any provision for the decline in value of these investments and hence as and when these investments are liquidated, we will book profits and / or losses, if any based on the actual value we can recover for these investments and the same if at a lesser value than its carrying book value could adversely affect our results of operations.

27. The demand for leased premises is dependent on the performance of the property market in the areas in which we operate, and any slowdown in the demand for such real estate property and the demand for business of our clients could adversely affect our business.

We provide premises on lease to our clients, which are educational institutions, colleges and corporates. Any slowdown in their business or slack in the real estate leasing markets in which we operate, may adversely affect our business operations. It is not possible to predict whether demand for commercial property in the areas in which we operate or generally will continue to grow in the future, as many social, political, economic, legal and other factors may affect the development of the property market. Accordingly, there can be no assurance that the level of demand will consistently match the level of supply. In the event of any unfavourable developments in the supply and demand or any decreases in property prices in the areas in which we operate or other parts in India, our business, financial condition and results of operations may be adversely affected.

28. Our Company has entered into certain related party transactions and may continue to do so in the future.

Our Company has entered into related party transactions with our Promoters, Directors and the Promoter Group aggregating ₹ 255.80 lakhs on a standalone basis for the last financial year ended March 31, 2017. While our Company believes that all such transactions have been conducted on the arms length basis, there can be no assurance that it could not have been achieved on more favourable terms had such transactions not been entered into with related parties. Furthermore, it is likely that our Company will enter into related party transactions in the future. There can be no assurance that such transactions, individually or in the aggregate, will not have an adverse effect on our financial condition and results of operation. For details, please refer to "Annexure XXIII - Related Party Transactions" under section titled "Financial Statements" on page no. 176 of this Prospectus.

29. We may incur significant infrastructure and development costs if certain key tenants default, withdraw their commitments or refuse to renew their leases.

We typically incur significant infrastructure and development costs based on the requirements of certain key tenants for built-to-suit premises. If the fit-out services are not carried out in accordance with the requirements of a particular potential tenant, we may be required to incur significant costs and delays in reconfiguring the premises to suit the specifications of new tenants. We may also face difficulties in sourcing replacement tenants willing to accept the existing customizations of the premises, if an existing tenant terminates its lease. Further, if we are unable to provide the reconfigured premises within the stipulated timeframe, potential tenants may withdraw their commitment and we may be required to pay certain penalties in accordance with the terms of the MoU entered into with such tenants. These costs, delays and difficulties may adversely affect our business, financial condition and results of operations.

30. Intellectual property rights are important to our business and we may be unable to protect them from being infringed by others which may adversely affect our business value, financial condition and results of operations

As on the date of this Prospectus, we have not yet obtained registration for our logo hence we do not enjoy the statutory protection accorded to a registered trademark.

and

Additionally, we have made application for the registration of our logo. However, there can be no assurance that our application will succeed. Grounds for refusal of registration may include the validity or scope of the application. If we are unable to obtain a registration, we may still continue to use the logo but remain vulnerable to infringement and passing-off by third parties and will not be able to enforce any rights against them. We may also need to change our logo which may adversely affect our reputation and business and could require us to incur additional costs. Although, we believe that that our present systems are adequate to protect our confidential information and intellectual property, there can be no assurance that our intellectual property data, trade secrets or proprietary technology will not be copied, infringed or obtained by third parties. Further, our efforts to protect our intellectual property may not be adequate and may lead to erosion of our business value and our operations could be adversely affected. This may lead to litigations and any such litigations could be time consuming and costly and their outcome cannot be guaranteed. Our Company may not be able to detect any unauthorized use or take appropriate and timely steps to enforce or protect our intellectual property, which may adversely affect our business, financial condition and results of operations. For further details pertaining to our intellectual property, please refer to the chapter titled "Business Overview" beginning on page no. 83 of this Prospectus.

31. In addition to normal remuneration, other benefits and reimbursement of expenses some of our Directors (including our Promoters) and Key Managerial Personnel may be interested in our Company to the extent of their shareholding and dividend entitlement in our Company.

Some of our Directors (including our Promoters) and Key Managerial Personnel are interested to the extent of the Equity Shares held by them, or their relatives or our Group Entities in our Company, in addition to normal remuneration or benefits and reimbursement of expenses which may become payable to them. Our Promoters are interested in the transactions entered into between our Company and themselves as well as between our Company and our Group Entities. For further details, please refer to the chapters titled "Business Overview" and "Our Promoters and Promoters Group", beginning on page nos. 83 and 122, respectively and the Annexure XXIII titled "Related Party Transactions" under chapter titled "Financial Statements" beginning on page no. 176 of the Prospectus.

32. Our Promoters and Promoter Group may continue to retain majority control in the Company after the Offer, which will enable them to influence the outcome of matters submitted to shareholders for approval. The Promoter Group may have interests that are adverse to the interests of our other shareholders and may take positions with which our other shareholders do not agree.

Our Promoters and Promoter Group may beneficially own approximately 71.96% of our post-Offer equity share capital. As a result, the Promoter Group may have the ability to control our business including matters relating to any sale of all or substantially all of our assets, the timing and distribution of dividends and the election or termination of appointment of our officers and directors. This control could delay, defer or prevent a change in control of the Company, impede a merger, consolidation, takeover or other business combination involving the Company, or discourage a potential acquirer from making a tender offer or otherwise attempting to obtain control of the Company even if it is in the Company's best interest. In addition, for so long as the Promoter Group continues to exercise significant control over the Company, they may influence the material policies of the Company in a manner that could conflict with the interests of our other shareholders. The Promoter Group may have interests that are adverse to the interests of our other shareholders and may take positions with which our other shareholders do not agree.

33. If we suffer a large uninsured loss or if we suffer an insured loss that significantly exceeds our insurance coverage, our financial condition and results of operations may be adversely affected.

Our business and assets could suffer damage from fire, natural calamities, misappropriation or other causes, resulting in losses, which may not be fully compensated by insurance. While we believe that we maintain insurance coverage in amounts consistent with industry norms, our insurance policies do not cover all risks and are subject to exclusions and deductibles. There can be no assurance that the terms of our insurance policies will be adequate to cover any damage or loss suffered by us or that such coverage will continue to be available on reasonable terms or will be available in sufficient amounts to cover one or more large claims, or that the insurer will not disclaim coverage as to any future claim.

Further, we are required to renew these insurance policies from time to time and in the event, if we fail to renew the insurance policies within the time period prescribed in the respective insurance policies or not obtain at all, we may face significant uninsured losses. If we suffer a large uninsured loss or if any insured loss suffered by us significantly exceeds our insurance coverage, our business, financial condition and results of operations may be adversely affected. For further details of the insurance policies taken by us, please refer the chapter "Business Overview—Insurances" on page no. 83 of this Prospectus.

34. Our operations and our work force are exposed to various hazards and we are exposed to risks arising from construction related activities that could result in material liabilities, increased expenses and diminished revenues.

There are certain unanticipated or unforeseen risks that may arise in the course of real estate development due to adverse weather and geological conditions such as storm, hurricane, lightning, flood, landslide and earthquake. Additionally, our operations are subject to hazards inherent in providing architectural and construction services, such as risk of equipment failure, impact from falling objects, collision, work accidents, fire or explosion, including hazards that may cause injury and loss of life, severe damage to and destruction of property and equipment, and environmental damage. Any such risk could result in exposing us to material liabilities, increase our expenses, adversely affect our reputation and may result in a decline in our revenues. We cannot assure that we may be able to prevent any such incidents in the future.

35. Our registered office is shared with other group companies and ventures of our promoters.

We operate from office situated in "Shradha House" a building owned by our company. However; these office premises are also shared by our group companies or associates or other ventures of our promoters. Any material adverse development w.r.t these companies or firms could materially affect our goodwill and financial condition in the future.

36. Our success largely depends on our ability to attract and retain our Key Managerial Personnel. Any loss of our Key Managerial Personnel could adversely affect our business, operations and financial condition

Our Company is mainly promoter driven. However, we depend on our key managerial persons for executing their specific tasks and skills. If one or more members of our Key Managerial Personnel are unable or unwilling to

continue in his/her present position, it may be difficult to find a replacement, and business might thereby be adversely affected.

Competition for Key Managerial Personnel in our industry is intense and it is possible that our Company may not be able to retain existing Key Managerial Personnel or may fail to attract/ retain new employees at equivalent positions in the future. As such, loss of Key Managerial Personnel could adversely affect our business, results of operations and financial condition. For further details on the key managerial personnel of our Company, please refer to the chapter titled "Our Management" beginning on page no. 109 of this Prospectus.

37. Any failure in our IT systems could adversely impact our business.

Any delay in implementation or disruption of the functioning of our IT systems could disrupt our ability to track, record and analyses the work in progress, cause loss of data and disruption to our operations including, an inability to assess the progress of the projects, process financial information or manage creditors / debtors or engage in normal business activities. This could have a material effect on our business operations.

RISK FACTORS RELATED TO EQUITY SHARES

38. Any further issuance of Equity Shares by our Company or sale of Equity Shares by any significant shareholders may adversely affect the trading price of the Equity Shares.

Any future issuance of Equity Shares by our Company could dilute the investors' shareholding. Any such future issuance of Equity Shares or sales of Equity Shares by any of our significant shareholders may also adversely affect the trading price of the Equity Shares, and could impact our ability to raise capital through an offering of securities. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of the Equity Shares. Upon completion of the Offer, 20% of our post-Offer paid-up capital held by our Promoters will be locked up for a period of three years and entire pre-Offer Equity Share Capital will be locked up for a period of one year from the date of allotment of Equity Shares in the Offer. For further information relating to such Equity Shares that will be locked, please refer the chapter titled "Capital Structure" beginning on page no. 51 of the Prospectus.

39. There is no existing market for our Equity Shares, and we do not know if one will develop. Our stock price may be highly volatile after the Offer and, as a result, you could lose a significant portion or all of your investment.

There is no guarantee that our Equity Shares will be listed on the Stock Exchange in a timely manner or at all and any trading closures at the Stock Exchange may adversely affect the trading price of our Equity Shares. Prior to the Offer, there has not been a public market for the Equity Shares. Further, we cannot predict the extent to which investor interest will lead to the development of an active trading market on the Stock Exchanges or how liquid that market will become. If an active market does not develop, you may experience difficulty selling the Equity Shares that you purchased. The Offer Price is not indicative of prices that will prevail in the open market following the Offer. Consequently, you may not be able to sell your Equity Shares at prices equal to or greater than the Offer Price. The market price of the Equity Shares on the Stock Exchanges may fluctuate after listing as a result of several factors, including the following:

- Volatility in the Indian and other Global Securities Markets;
- The performance of the Indian and Global Economy;
- Risks relating to our business and industry, including those discussed in this Prospectus;
- Strategic actions by us or our competitors;
- Investor perception of the investment opportunity associated with the Equity Shares and our future performance;
- Adverse media reports about us, our shareholders or Group Companies;
- Future sales of the Equity Shares;
- Variations in our quarterly results of operations;
- Differences between our actual financial and operating results and those expected by investors and analysts;
- Our future expansion plans;
- Perceptions about our future performance or the performance of Real Estate companies generally;
- Performance of our competitors in the Real Estate Industry and the perception in the market about investments in the real estate sector;
- Significant developments in the regulation of the Real Estate industry in our key locations;

- Changes in the estimates of our performance or recommendations by financial analysts;
- Significant developments in India's economic liberalisation and deregulation policies; and
- Significant developments in India's fiscal and environmental regulations. There has been significant volatility in the Indian stock markets in the recent past, and our Equity Share

Price could fluctuate significantly as a result of market volatility. A decrease in the market price of the Equity Shares could cause you to lose some or all of your investment.

40. Our ability to pay dividends in the future may be affected by any material adverse effect on our future earnings, financial condition or cash flows.

Our ability to pay dividends in future will depend on our earnings, financial condition and capital requirements. Our business is working capital as well as capital intensive. We are a fast growing Real Estate company with a long term strategy to increase our Formulations exposure which would require us to incur capital expenditure and additional working capital requirement. We may be unable to pay dividends in the near or medium term, and our future dividend policy will depend on our capital requirements and financing arrangements in respect of our operations, financial condition and results of operations.

41. You will not be able to sell immediately on an Indian stock exchange any of the Equity Shares you purchase in the Issue until the Issue receives the appropriate trading approvals.

Our Equity Shares will be listed on the NSE EMERGE Platform of National Stock Exchange of India Limited. As per the SEBI Circular CIR/CFD/POLICYCELL/11/2015 dated November 10, 2015, we are required to list our Equity Shares within 6 working days of the Issue Closing Date. Pursuant to Indian regulations, certain actions must be completed before the Equity Shares can be listed and trading may commence. Investors' book entry, or "demat," accounts with depository participants in India are expected to be credited within one working days of the date on which the basis of allotment is approved by the Indian Stock Exchanges. Thereafter, upon receipt of final approval from the Indian Stock Exchange, trading in the Equity Shares is expected to commence within two working days of the date on which the basis of allotment is approved by the designated Stock Exchange. We cannot assure you that the Equity Shares will be credited to investors' demat accounts, or that trading in the Equity Shares will commence, within the time periods specified above. Any delay in obtaining the approvals would restrict your ability to dispose of your Equity Shares.

42. Investors may be subject to Indian taxes arising out of capital gains on the sale of our Equity Shares

Capital gains arising from the sale of the Equity Shares are generally taxable in India. Any gain realized on the sale of the Equity Shares on a stock exchange held for more than 12 months will not be subject to capital gains tax in India if Securities Transaction Tax (STT), has been paid on the transaction. STT will be levied on and collected by an Indian stock exchange on which the Equity Shares are sold. Any gain realized on the sale of the Equity Shares held for more than 12 months by an Indian resident, which are sold other than on a recognized stock exchange and as a result of which no STT has been paid, will be subject to capital gains tax in India. Further, any gain realized on the sale of the Equity Shares held for a period of 12 months or less will be subject to capital gains tax in India. Capital gains arising from the sale of the Equity Shares will be exempt from taxation in India in cases where an exemption is provided under a treaty between India and the country of which the seller is a resident. Generally, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdictions on gains arising from a sale of our Equity Shares. For more information, see "Statement of Tax Benefits". However, capital gains on the sale of the Equity Shares purchased in the Issue by residents of certain countries will not be taxable in India by virtue of the provisions contained in the taxation treaties between India and such countries.

EXTERNAL RISK FACTORS

43. The cyclical nature of the Indian real estate market could cause us to experience fluctuations in property values and lease income over time.

Historically, the Indian real estate market has been cyclical, a phenomenon that can affect the optimal timing for both the acquisition of sites and the sale or lease of our properties. We cannot assure you that real estate market cyclicality will not continue to affect the Indian real estate market in the future. As a result, we may experience fluctuations in property values and lease income over time which in turn may adversely affect our business, financial condition and results of operations.

44. The GoI has implemented a new national tax regime by imposing GST.

The GoI has implemented a comprehensive national GST regime from July 01, 2017 that will combine taxes and levies by the Central and State Governments into a unified rate structure. GST is a dual levy with state GST and central GST. Central GST will replace the current central taxes and duties such as excise duty, service tax, counter vailing duty, special additional duty of customs, central charges and cesses. The state GST will replace local state taxes like VAT, CST, octroi and others including state cesses and charges.

Any future increases or amendments may affect the overall tax efficiency of companies operating in India and may result in significant additional taxes becoming payable.

Our business being construction centric, most of the current central taxes and duties and local state taxes and duties are applicable to our business. We are in the process to understand the quantification of the impact of this development at this stage due to limited information available in the public domain. If we are taxed at a higher rate than the current tax rates, our financial condition and results of operations may be adversely affected.

Further, we may also be required to make changes in our internal process to adapt to the requirements of GST. We cannot assure you if we will be able to effectively carry out such changes. To ensure compliance with the requirements of the GST laws, we may also need to allocate additional resources, which may increase our regulatory compliance costs and divert management attention. Any increase in our compliance requirements or in our compliance costs may have an adverse effect on our business and results of operations.

45. The Companies Act, 2013 has effected significant changes to the existing Indian company law framework, which may subject us to higher compliance requirements and increase our compliance costs.

A majority of the provisions and rules under the Companies Act, 2013 have been notified and have come into effect from the date of their respective notification, resulting in the corresponding provisions of the Companies Act, 1956 ceasing to have effect. The Companies Act, 2013 has brought into effect significant changes to the Indian company law framework, such as in the provisions related to issue of capital, disclosures in Prospectus, corporate governance norms, audit matters, related party transactions, introduction of a provision allowing the initiation of class action suits in India against companies by shareholders or depositors, a restriction on investment by an Indian company through more than two layers of subsidiary investment companies (subject to certain permitted exceptions), prohibitions on loans to directors and insider trading and restrictions on directors and key managerial personnel from engaging in forward dealing. Further, companies meeting certain financial thresholds are also required to constitute a committee of the board of directors for corporate social responsibility activities and ensure that at least 2% of the average net profits of the company during three immediately preceding financial years are utilized for corporate social responsibility activities. Penalties for instances of non-compliance have been prescribed under the Companies Act, 2013, which may result in inter alia, our Company, Directors and Key Managerial Employees being subject to such penalties and formal actions as prescribed under the Companies Act, 2013, should we not be able to comply with the provisions of the New Companies Act within the prescribed timelines, and this could also affect our reputation.

To ensure compliance with the requirements of the Companies Act, 2013 within the prescribed timelines, we may need to allocate additional resources, which may increase our regulatory compliance costs and divert management attention. While we shall endeavour to comply with the prescribed framework and procedures, we may not be in a position to do so in a timely manner.

The Companies Act, 2013 introduced certain additional requirements which do not have corresponding equivalents under the Companies Act, 1956. Accordingly, we may face challenges in interpreting and complying with such provisions due to limited jurisprudence on them. In the event, our interpretation of such provisions of the Companies Act, 2013 differs from, or contradicts with, any judicial pronouncements or clarifications issued by the Government in the future, we may face regulatory actions or we may be required to undertake remedial steps. Additionally, some of the provisions of the Companies Act, 2013 overlap with other existing laws and regulations (such as the corporate governance norms and insider trading regulations). We may face difficulties in complying with any such overlapping requirements. Further, we cannot currently determine the impact of provisions of the Companies Act, 2013, which are yet to come in force. Any increase in our compliance requirements or in our compliance costs may have an adverse effect on our business and results of operations.

46. Any changes in the regulatory framework could adversely affect our operations and growth prospects.

Our Company is subject to various regulations and policies. For details please see "Key Industry Regulations and Policies" beginning on page no. 94 of this Prospectus. Our business and prospects could be materially adversely affected by changes in any of these regulations and policies, including the introduction of new laws, policies or regulations or changes in the interpretation or application of existing laws, policies and regulations. There can be no assurance that our Company will succeed in obtaining all requisite regulatory approvals in the future for our operations or that compliance issues will not be raised in respect of our operations, either of which could have a material adverse affect on our business, financial condition and results of operations.

47. Civil disturbances, extremities of weather, regional conflicts and other political instability may have adverse affects on our operations and financial performance.

Certain events that are beyond our control such as earthquake, fire, floods and similar natural calamities may cause interruption in the business undertaken by us. Our operations and financial results and the market price and liquidity of our equity shares may be affected by changes in Indian Government policy or taxation or social, ethnic, political, economic or other adverse developments in or affecting India.

48. Terrorist attacks, civil unrest and other acts of violence or war involving India and other countries could adversely affect the financial markets and our business.

Terrorist attacks and other acts of violence or war may negatively affect the Indian markets on which our Equity Shares will trade and also adversely affect the worldwide financial markets. These acts may also result in a loss of business confidence, impede travel and other services and ultimately adversely affect our business. In addition, any deterioration in relations between India and Pakistan might result in investor concern about stability in the region, which could adversely affect the price of our Equity Shares.

India has also witnessed civil disturbances in recent years and it is possible that future civil unrest as well as other adverse social, economic and political events in India could have a negative impact on the value of share prices generally as well as the price of our Equity Shares. Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse impact on our business and the price of our Equity Shares.

49. Lack of improvement in or worsening global and Indian economic conditions have affected and may continue to materially and adversely affect the demand for real estate as well as the availability of financing in India.

The global economy and financial markets have experienced extreme levels of instability, and there is substantial volatility in markets across asset classes, including stock markets, foreign exchange markets, commodity markets, fixed income markets and credit markets, which has been exacerbated by concerns regarding the ability of certain countries to service their sovereign debt obligations, triggered by large budget deficits and rising public debts. Further, there are rising concerns of a possible slowdown in the emerging economies. No assurance can be given that a further economic downturn or financial crisis will not occur, or that measures taken to overcome a crisis will be sufficient to restore stability in the global markets in the short term or beyond. The Indian economy is influenced by economic conditions, developments and volatility in global markets.

We believe that our business is dependent to a large extent on the economic growth in India, and the availability of real estate financing in India and a stable regulatory framework. Any decline in the economy or adverse changes in the market conditions or regulatory framework in India could adversely affect our results of operations and future growth. The demand for our products and services is influenced by certain changes in these regions that include, among others, changes in government policies, economic conditions, demographic trends, consumer confidence, employment levels, fuel prices, interest rates, taxation, easy availability of credit and increase in the disposable income available to our customers.

These factors may adversely affect our business and lead to decreases in the sales of, or market rates for, our real estate developments; delays in the release of finances for certain of the projects in order to take advantage of future periods of more robust real estate demand; decreases in Occupancy Rates for our commercial or retail properties; insolvency of key contractors resulting in construction delays; insolvency of key tenants in the commercial and retail properties; inability of customers to obtain credit to finance purchase of our properties; changes in the applicable regulatory framework; and litigation. The realization of any of these risks could materially and adversely affect our business, results of operations, financial condition and prospects.

Additionally, stricter provisioning and risk weightage norms imposed by the RBI on real estate financing by banks and financial institutions have in the past affected, and may continue to affect, the availability of funds to property developers. The RBI or the Government may take further measures that result in reduction of credit to the real estate sector. If the demand for, or supply of, real estate financing at attractive rates were to diminish or cease to exist, our business and financial results could be adversely affected.

50. We may have to prepare our financial statements from April 01, 2018 onwards under the Indian Accounting Standards ("Ind AS"). As Ind AS is different in many respects from Indian GAAP, our financial statements from April 01, 2018 may not be comparable to our historical financial statements and our financial statements for the year ending March 31, 2017 and Quarter Ended June 30, 2017 prepared under Indian GAAP may not be comparable to our financial statements for the year ending March 31, 2017 and Quarter Ended June 30, 2017 prepared under Ind AS for comparison purposes. In addition, our transition to Ind AS reporting could have an adverse effect on our business and results of operations.

We currently prepare our financial statements under Indian GAAP. The Companies (Indian Accounting Standards) Rules, 2015 ("IAS Rules"), as amended by the Companies (Indian Accounting Standards) (Amendment) Rules, 2016, enacted changes to Indian GAAP that are intended to align Indian GAAP further with IFRS. The IAS Rules provide that the financial statements of the companies to which they apply shall be prepared and audited in accordance with Ind AS. Ind AS is different in many respects from Indian GAAP. All NBFCs and HFCs having a net worth of more than ₹ 5,000.00 million are required to mandatorily adopt Ind AS for the accounting period beginning from April 01, 2018, with comparatives for the period ending on March 31, 2017. Although any company may voluntarily implement Ind AS for the accounting period beginning from April 01, 2015, we intend to implement Ind AS for the accounting period beginning from April 01, 2018. As there is not yet a significant body of established practice, such as interpretations of Ind AS, on which to draw in forming judgments regarding the Ind AS implementation and application, we have not determined with any degree of certainty the impact the adoption of Ind AS will have on our financial statements. However, we know that the Ind AS will change our methodology for estimating allowances for doubtful debt losses. Ind AS will require us to value our NPAs by reference to their market value (if a ready market for such loans exists) or to calculate the present value of the expected future cash flows realisable from our loans, including the possible liquidation of collateral (discounted at the loan's effective interest rate) in estimating allowances for doubtful debt losses. This may result in us recognising higher allowances for doubtful debt losses in the future, which will adversely affect our results of our operations. Accordingly, our financial statements for the period commencing from April 01, 2018 may not be comparable to our historical financial statements and our financial statements for the year ending March 31, 2017 prepared under Indian GAAP may not be comparable to our financial statements for the year ending March 31, 2017 prepared under Ind AS for comparison purposes.

In our transition to Ind AS reporting, we may encounter difficulties in the on-going process of implementing and enhancing our management information systems. Our management may also have to divert significant time and additional resources in order to implement Ind AS on a timely and successful basis. Moreover, there is increasing competition for the small number of Ind AS experienced accounting personnel available as more Indian companies begin to prepare Ind AS financial statements. Therefore, our transition to Ind AS reporting could have an adverse effect on our business and results of operations.

51. Our business and activities may be further regulated by the Competition Act, 2002 and any adverse application or interpretation of the Competition Act could materially and adversely affect our business, financial condition and results of operations.

The Competition Act, 2002 was enacted for the purpose of preventing practices having an adverse effect on competition in India and has mandated the CCI to regulate such practices. Under the Competition Act, 2002, any arrangement, understanding or action, whether formal or informal, which causes or is likely to cause an appreciable adverse effect on competition in India are void and may result in substantial penalties. Any agreement among competitors which directly or indirectly determines purchase or sale prices, directly or indirectly results in bid rigging or collusive bidding, limits or controls production, supply, markets, technical development, investment or the provision of services, or shares the market or source of production or provision of services in any manner, including by way of allocation of geographical area or types of goods or services or number of customers in the relevant market or any other similar way, is presumed to have an appreciable adverse effect on competition in the relevant market in India and shall be void. Further, the Competition Act, 2002 prohibits the abuse of dominant position by any enterprise. If it is proved that the contravention committed by a company took place with the consent or connivance or is attributable to any neglect on the part of, any director, manager, secretary or other officer of such company, that person shall be guilty of the contravention and may be punished. The manner in

which the Competition Act, 2002 and the CCI affect the business environment in India may also adversely affect our business, financial condition and results of operations.

SECTION III – INTRODUCTION

SUMMARY OF OUR INDUSTRY

INDIAN REAL ESTATE SECTOR

Introduction

The real estate sector is one of the most globally recognized sectors. In India, real estate is the second largest employer after agriculture and is slated to grow at 30 per cent over the next decade. The real estate sector comprises four sub sectors - housing, retail, hospitality, and commercial. The growth of this sector is well complemented by the growth of the corporate environment and the demand for office space as well as urban and semi-urban accommodations. The construction industry ranks third among the 14 major sectors in terms of direct, indirect and induced effects in all sectors of the economy.

It is also expected that this sector will incur more non-resident Indian (NRI) investments in both the short term and the long term. Bengaluru is expected to be the most favoured property investment destination for NRIs, followed by Ahmedabad, Pune, Chennai, Goa, Delhi and Dehradun.

Market Size

The Indian real estate market is expected to touch US\$ 180 billion by 2020. The housing sector alone contributes 5-6 per cent to the country's Gross Domestic Product (GDP).

In the period FY2008-2020, the market size of this sector is expected to increase at a Compound Annual Growth Rate (CAGR) of 11.2 per cent. Retail, hospitality and commercial real estate are also growing significantly, providing the much-needed infrastructure for India's growing needs.

The private equity investments in real estate increased 26 per cent to a nine-year high of nearly Rs 40,000 crore (US\$ 6.01 billion) in 2016.

Sectors such as IT and ITeS, retail, consulting and e-commerce have registered high demand for office space in recent times. The office space absorption in 2016 across the top eight cities amounted to 34 million square feet (msf) with Bengaluru recording the highest net absorption during the year. Information Technology and Business Process Management sector led the total leasing table with 52 per cent of total space uptake in 2016. Mumbai is the best city in India for commercial real estate investment, with returns of 12-19 per cent likely in the next five years, followed by Bengaluru and Delhi-National Capital Region (NCR).

INDIAN REAL ESTATE: A NEW PARADIGM ON ANVIL

Real estate has been a key driver for the economy. However, poor transparency in the sector and dwindling consumer confidence had put the industry under strain in the past 3 to 4 years. The recent introduction of the Real Estate (Regulation and Development) Act, 2016 has pumped in a new lease of life into the sector. It is expected to weed out unorganised players from the industry and whip up buyers' confidence bringing buoyancy back into the sector. The subsequent stride in re-engineering momentum back into the sector was the governments push towards 'affordable housing'. By giving it infrastructure status the government would attract private developers towards these projects. At the same time home loan sops and interest subsidies under the Pradhan Mantri Awas Yojna would fire up the demand for these homes. The expected increase in transparency due to implementation of RERA and formalisation of sector with the implementation of GST, the sector would aid the sector in getting access to variety of formal sources of finance. These reforms will go a long way in enticing the institutional investors to invest in this sector.

The government's emphasis on housing and its efforts to mitigate the risks in the real estate sector by introduction of RERA has not gone unnoticed by foreign institutional investors and also the sovereign and pension funds. A large number of these investors and funds have made changes to the portfolio allocation strategy allowing investment exposure to Indian real estate. The pension and private equity funds are investing in commercial assets (office spaces and malls) and also in under-construction residential properties. Players such as Qatar Holdings, CPPIB, Blackstone, Ivanhoe Cambridge, APG and Xander are readying blueprints for longterm investments in the realty segment. Not just foreign investors even the domestic investors are raising funds to invest in this sector.

The past 3-4 years have been an extremely stressful period for the Indian real estate with markets being subdued in terms of launches and sales across major metros. However, this year is expected to be the year of inflection with new regulations coming into place. These regulations and reforms would herald the industry into its next wave of growth. Right from buying of land, funding of projects to delivery of the final product to the buyer, the entire process is going to witness a drastic change.

Despite subdued financial performance of the realty companies over the past few years, the share price of the companies and also the BSE Realty index has outperformed the market. The share performance is generally the leading indicator of how the sector is going to perform in the near future. The reality index has outperformed the market over the past year. The government has realized the potential of this sector to create jobs and also drive the GDP growth of the country. Hence it has been trying its best to revive the sector. It would be just a matter of time before this sector realizes and starts delivering on its full potential.

SEGMENTS IN THE INDIAN REAL ESTATE SECTOR

Residential space

Residential segment contributes ~80 per cent of the real estate sector. Total residential unit launches stood at around 1.08,200.

Commercial space

- Few players with presence across India.
- > The office space absorption in 2016 across the top eight cities amounted to 34 million square feet (msf).

Retail space

- > FDI in multi brand retail to boost demand.
- > Supply of retail space stood at 3.4 million sq ft in 2016.
- > The retail segment in the real estate sector attracted an investment of over \$700 million in 2016.

Hospitality space

As of 30 July 2015, the country had 972 approved hotels with 63715 rooms.

• SEZs

- As of FY16, the government has formally approved 415 SEZs, of which 205 are in operation.
- ➤ Majority of the SEZs are in the IT/ ITeS sector.

RESIDENTIAL SEGMENT

- After the tumultuous H2 2016 when the demonetisation needle punctured the market pulling down residential sales and launches by 46% and 23% respectively, H1 2017 has ushered as an eventful period.
- The first two months of H1 2017 saw consumers and the industry as a whole grapple with the aftermath of demonetisation. While activity encouragingly picked up in March and April, May 1 earmarked the dawn of the single largest change in history of Indian real estate industry through the implementation of the Real Estate (Regulation and Development) Act 2016.
- After the initial dilemma regarding the implementation of the RERA, largely all stakeholders have reconciled to the fact that RERA will be a reality sooner than later. With developers re-directing efforts from launches to RERA compliance, pace of launches was lower in H1 2017.
- In the backdrop of these landmark events this performance has also been dictated by the developers baggage of unsold inventory, which until a year ago was mainly in the under construction category. However, now 'ready for possession' apartments are also available across markets. With ready projects kept outside the ambit of RERA, developers have been focusing heavily on sales of their ready possession stock.

- The impetus to the realty market particularly the residential market has come with government's focused attention to the affordable housing segment. Over the last year the government has announced a series of measures to revive a fresh lease of life into this segment of market.
- We believe that the focus on affordable housing is a structural change and the supply side response to this focus area implies that it is going to be a sustainable theme going forward. The latest set of numbers indicate that the share of less than ₹ 2.5 mn ticket size housing that had risen from 17% in H1 2016 to 20% in H2 2016, has further jumped in the latest H1 2017 period to 36%. The category of housing valued at less than INR 5 mn is now as much as 71% across the top 8 cities, substantially higher than the 52% share in H1 2016.
- With this backdrop, residential launches in the top eight cities of the country declined by 41% to 62,738 units in H1 2017 compared to 1,07,120 units in H1 2016. The decline was 9% compared to the demonetisation period of H2 2016 when 68,702 units were launched. Ahmedabad and NCR wore the worst hit with launches falling by 79% and 73% respectively.
- With consumers opening up to the confidence infused by RERA and a slew of government measures towards affordable housing, sales decline was not as severe as noticed in launches. Sales during H1 2017 declined by 11% to 1,20,756 units in H1 2017 compared to 1,35,016 units in H1 2016. Sequentially, however, the sales are 11% better compared to the demonetisation period of H2 2016 when 1,09,159 units were sold.
- Unsold inventory levels at 5,96,044 units in H1 2017 are 10% lower than 6,60,239 units in H1 2016 and are consistently trending lower compared to its peak of in H2 2014. However, the numbers are lower mainly on account of the shrinking market size.
- With the baggage of unsold inventory and the state of the residential property market, weighted average property price has stagnated. Developers in most markets have been forthcoming in offering freebies and discount for sales closure.

OFFICE MARKET SEGMENT

- Office market fundamentals across the country remain tight with vacancy levels hitting new lows for the 11th straight period as the supply crunch shows little sign of abating with any meaningful impact.
- The supply crunch that has hamstrung the market and macro headwinds in the form of the slowdown in the IT/ ITeS spending by Europe and USA has weighed down office space demand and caused a 10% decline YoY in transaction levels during H1 2017 compared to a 13% growth in the previous reference period.
- The 10% decline in transaction levels translates to 18.1 mn sq ft of office space being taken up across the six office space markets during H1 2017. A similar 5% decline in supply saw 17.9 mn sq ft come online in the same period. (Source: Knight Frank Report, Indian Real Estate, Residential and Office, January June 2017)

Our Completed projects are located in Nagpur, which we believe is an attractive real estate market in terms of returns on investment, product positioning and depth of demand for real estate developments across segments and price points. Nagpur is the largest city in central India and the third largest city in the western state of Maharashtra after Mumbai and Pune. Being the geographical centre of India, Nagpur is fast becoming the top choice of investors for putting in capital into the city's commercial and residential infrastructure. Being rated as the top city in terms of general quality of life, health services, greenery and public transportation has helped it make a niche in the market formerly dominated by the metropolitan cities.

Scalability due to our outsourcing model

We utilise an outsourcing model that allows scalability and emphasises contemporary design and quality construction. We also have strong and long-standing relationships with external service providers such as architects, landscape planners and contractors and outsource all of our construction and design work. This allows us to work with several with domestic contractors that provide us with innovative design capabilities and quality construction. Our Subsidiary Company has recently completed a project "Shradha Busiplex" at Hinganghat, Wardha.

Further by making an additional investment in Suntech Infraestate Nagpur Private Limited through our object of the issue for part finance the construction and development of a residential and commercial project "Victoria II" and it will become a Subsidiary Company and hence we would be able to consolidate its financial statements as per applicable accounting standards.

We expect to achieve benefits in form of capital appreciation from these investments, improvement in our financial results (as per "Subsidiary Accounting") as well as future synergies if any.

For risks related to our business, our Company and our industry, see "Risk Factors" on page no. 11 of this Prospectus.

OUR STRATEGY

Balanced revenue generation model for cash flow visibility

We intend to maintain a balance of assets developed for sale and assets developed for ownership by us and leased to third parties to enable us to achieve steady and visible cash flow and better manage cyclical risks. We believe that our leased properties provide us with a stable income stream which helps to compensate for volatility in sales of our residential and other projects for sale. In determining the proportion of assets to be retained by us, we consider a number of factors, such as prevailing and expected market conditions, the strategic nature and location of the asset, and cash flow and other needs of our business.

Enhance our project execution capabilities

We intend to focus on enhancing project execution capabilities so as to derive twin benefits of customer's satisfaction and improvements in operating margins. We believe that we have developed a reputation for undertaking challenging real estate projects and will continue. Our ability to effectively manage projects will be crucial to our continued success as a real estate Company to do so in near future.

Flexibility in capital investment and mode of development

We focus on acquiring land for development in the near- to medium-term. While we have purchased and will continue to purchase land for development by making upfront payments for the land, we also look to develop projects through alternative structures that reduce our upfront capital commitment. We have developed a strategy in where we mitigated the risk by paying for the land partly in cash and partly in constructed area. We believe that such development strategies enable our joint venture partner to get more value out of his land as our brand and the quality of our product are able to add value to their property and in turn enable us to access quality land to develop and sell without significant capital investment.

Exploring Properties and Focus on Hospital Infrastructure

There is tremendous demand for hospitals in India and there is a gap between the availability of beds and required beds. Due to increasing medical tourism, there is a need to upgrade service standards and provide state-of-the-art facilities to bring service levels on par with global standards. This demand has created excellent opportunities for investors. India is also witnessing growth in the medical infrastructure sector, including advanced Diagnostic equipment. We intend to focus on identifying and acquiring real estate assets in Pune, Nagpur and rest of the Vidarbha. Accordingly, we intend to continue to focus on our strategy of developing hospital infrastructure in Pune, Nagpur and rest of the Vidarbha and develop a brand associated with quality, track-record of successful execution and value for money.

Continue to strengthen relationships with key service providers

We intend to continue to follow our outsourcing model and further strengthen our relationships with key service providers such as architects and contractors. This will enable our management to focus more on our core business by continuing to outsource the design and construction to our service providers. We also believe that our outsourcing model will enable us to develop projects with quality design and construction as we are able to access the best service providers in their respective fields to create the type of projects that we believe our customers want in Nagpur and in other parts of India. With dedicated and prudent business practices and processes, we endeavour to construct landmark projects across India's landscape that not only meets, but exceeds the expectations of our customers, business partners, stakeholders as well as the society at large.

These amounts are to be invested by subscribing to new equity shares of Suntech Infraestate Nagpur Private Limited. The details of the same are as below:

(b) Acquisition of Land or Land Development Rights

We are a real estate development company, engaged in the business of development and sale of residential as well as commercial properties (the "Development Business") and the development and leasing of commercial properties (the "Lease Business"). We are primarily operating in Nagpur focused on premium developments with presence in residential, Commercial and hospitality in mixed-use and single-segment developments.

As a part of our business strategy, we continue to focus on acquiring land or land development rights for development in the near- to medium-term for developing new projects. We may undertake such acquisition or development either directly, through subsidiaries or as a part of joint venture with other parties or in any other manner. We may also look at acquiring land holding companies as a means of acquiring land and/or land development rights. For a real estate company, such as us, land is the basic raw material and acquisition of attractive parcels of land or land development rights on a continuous basis is critical for the growth of our business. However, at present we have not entered into any definitive agreement with any party for acquisition of any particular identified land or land development rights thereon nor have we made any advance payments for the same.

Nagpur, where we primarily operate, it is the third largest city in Maharashtra. Availability of financial resources at the time of such acquisition opportunity is a big competitive advantage for any real estate developer. Further, after acquisition, land is developed by us over a period of time as the focus is on mixed use developments which have components of residential, commercial and hospitality.

We propose to acquire land or land development rights primarily in the Nagpur and / or Pune. Costs of acquiring land or land development rights will vary depending on various factors, such as, location of land in prime areas or otherwise, profile of the population in the surrounding areas, type of project that can be developed, general economic conditions and the extent of negotiations between us and the parties from whom we propose to acquire land. Further, besides the purchase price payable for the acquisition of land, the cost of acquisition would include various other components, such as brokerage, cost of title searches, stamp duty, taxes, legal fees, cost of conversion of the status of land and the cost of obtaining approvals. Typically for the acquisition of land or land development rights, we are required to pay an advance at the time of executing transaction agreements, with the remaining purchase price due upon completion of the acquisition. We may acquire lands through an auction and prior to bidding in the auction, we may be required to pay a refundable deposit or earnest money. In certain cases, we may be required to furnish a bank guarantee for which we would be required to pay the applicable bank charges. The estimated costs described in this section include such advances, deposits and bank charges. All these elements would be a part of the cost of acquisition of land or land development rights.

⁽³⁾ M/s. Y. N. Kanojiya & Co., Chartered Accountants has certified vide certificate dated November 15, 2017 that the amount deployed till October 31, 2017 at Project "Victoria II" was \ge 5,980.40 lakhs and further confirmed that the same was funded via combination of debt finance, equity and preference capital.

We intend to utilise the entire amount earmarked for the acquisition of land or land development rights within a period of 36 months commencing from the date of receipt of the Net Proceeds by the Company. As currently we have not identified the land which we propose to acquire, the proposed deployment of funds from Fiscal 2018 to Fiscal 2020 may vary from year to year. However, we anticipate that the entire amount would be utilised for acquisition of land or land development rights by Fiscal 2020. The process of acquisition of land or land development rights is a time consuming process which requires exhaustive set of diligence procedures to assess the title and is influenced by other factors. In the event we are unable to utilise the funds earmarked towards acquisition of land or land development rights by the end of Fiscal 2020, we may, with the approval of the Board of Directors, utilise the earmarked funds towards financing the construction expenses of such of our ongoing or planned projects as may be determined by the Board of Directors. Further, our Company shall not change the objects of the Issue unless we are authorized to do so by our shareholders by way of a special resolution, as required under Section 27 of the Companies Act, 2013. For further details please refer to the paragraph titled "Variation in Objects" forming part of the "Objects of the Issue" chapter beginning on page no. 62 of this Prospectus.

We undertake that the land or land development rights proposed to be acquired from the proceeds of the Issue shall not be acquired from the Promoter, Promoter Group entities, Group Companies, affiliates or any other related parties.

(c) General Corporate Purposes

We intent to utilize Rs. 308.10 lacs from the net proceeds of the issue (which is 21.13% of the Net Proceeds) towards General Corporate Purposes including strategic initiatives and acquisitions, brand building exercises and strengthening of our marketing capabilities subject to compliance with the necessary provisions of the Companies Act. In the event that we are unable to deploy proceeds towards items identified above, we may use the unutilised amount towards acquisition of land or land development rights, subject to approval of the Board of Directors.

Our management, in response to the competitive and dynamic nature of the industry, will have the discretion to revise its business plan from time to time and consequently our funding requirements and deployment of funds may also change. This may also include rescheduling the proposed utilisation of proceeds of the Issue and increasing or decreasing expenditure for a particular object vis-à-vis the utilisation of proceeds of the Issue. In case of a shortfall in the proceeds of the Issue, our management may also explore a range of options including utilising our internal accruals or seeking debt from future lenders. Our management expects that such alternate arrangements would be available to fund any such shortfall. Our management, in accordance with the policies of our Board, will have flexibility in utilising the proceeds for the purposes mentioned above and earmarked for general corporate purposes.

OVERVIEW OF THE GLOBAL AND INDIAN ECONOMY

Global Scenario

The US economy bounced back strongly in Q3:2016, underpinned by robust consumer spending and continuing improvement in the labour market. GDP growth decelerated sharply in Q4:2016 due to a large slippage in net exports, even though retail sales, consumer confidence and the purchasing manufacturers' index (PMI) suggested sustained momentum. Domestic demand grew (q-o-q) at the fastest pace in almost two years. Consumer confidence reached a 16-year high in March, though retail sales had slowed down in February. The Institute for Supply Management's (ISM) index suggested manufacturing expanded at its fastest pace in three years in February.

In the Euro area, GDP growth accelerated in H2:2016. Relatively low oil prices and sustained employment gains have provided support to household incomes. Improving consumer confidence and the PMI, which rose to a six-year high in March, indicate that activity continued to expand in Q1:2017. Nonetheless, the region remains vulnerable to a number of headwinds such as the formal beginning of the Brexit process, upcoming elections in several constituent countries and tightening of financial conditions.

The Japanese economy continued to recover at a modest pace even as the momentum weakened in H2:2016. Increases in private consumption and fixed investment were moderate, although there was some uptick in exports and industrial production towards end-2016. The manufacturing PMI improved during January and February but moderated again in March 2017. In the UK, economic growth gained momentum in H2: 2016, notwithstanding the uncertainties surrounding the negotiations relating to Brexit, as exports rose substantially following the weakening of the pound. However, manufacturing growth weakened for two consecutive months in February, indicating the possibility of a slowdown in 2017.

Indian Scenario

India has emerged as the fastest growing major economy in the world as per the Central Statistics Organisation (CSO) and International Monetary Fund (IMF). As per the Economic Survey 2016-17, the Indian economy should grow between 6.75 and 7.5 per cent in FY 2017-18. The improvement in India's economic fundamentals has accelerated in the year 2015 with the combined impact of strong government reforms, Reserve Bank of India's (RBI) inflation focus supported by benign global commodity prices.

India's consumer confidence index stood at 136 in the fourth quarter of 2016, topping the global list of countries on the same parameter, as a result of strong consumer sentiment, according to market research agency, Nielsen. Moody's has affirmed the Government of India's BAA3 rating with a positive outlook stating that the reforms by the government will enable the country perform better compared to its peers over the medium term.

The tax collection figures between April 2016 and January 2017 show an increase in Net Indirect taxes by 16.9 per cent and an increase in Net Direct Taxes by 10.79 per cent year-on-year, indicating a steady trend of healthy growth. The total number of e-filed Income Tax Returns rose 21 per cent year-on-year to 42.1 million in 2016-17 (till 28.02.17), whereas the number of e-returns processed during the same period stood at 43 million. Corporate earnings in India are expected to grow by over 20 per cent in FY 2017-18 supported by normalisation of profits, especially in sectors like automobiles and banks, while GDP is expected to grow by 7.5 per cent during the same period, according to Bloomberg consensus.

India has retained its position as the third largest start-up base in the world with over 4,750 technology start-ups, with about 1,400 new start-ups being founded in 2016, according to a report by NASSCOM. India's labour force is expected to touch 160-170 million by 2020, based on rate of population growth, increased labour force participation, and higher education enrolment, among other factors, according to a study by ASSOCHAM and Thought Arbitrage Research Institute (TARI). India's foreign exchange reserves stood at US\$ 366.781 billion as on March 17, 2017 as compared to US\$ 360 billion by end of March 2016, according to data from the RBI.

With the improvement in the economic scenario, there have been various investments leading to increased M&A activity. M&A activity in India more than doubled year-on-year to reach US\$ 61.26 billion in 2016-17. Early-stage start-ups in India are expected to raise US\$ 800 million in 2017, due to greater focus on profitability and sustainable growth, as per a report by InnoVen Capital.

India is expected to be the third largest consumer economy as its consumption may triple to US\$ 4 trillion by 2025, owing to shift in consumer behaviour and expenditure pattern, according to a Boston Consulting Group (BCG) report; and is estimated to surpass USA to become the second largest economy in terms of purchasing power parity (PPP) by the year 2040, according to a report by PricewaterhouseCoopers. Also, the Prime Minister, Mr Narendra Modi has stated that India has become the world's fastest growing large economy, and is expected to grow five-fold by 2040, owing to a series of policy measures.

INDIAN REAL ESTATE SECTOR

Introduction

The real estate sector is one of the most globally recognized sectors. In India, real estate is the second largest employer after agriculture and is slated to grow at 30 per cent over the next decade. The real estate sector comprises four sub sectors - housing, retail, hospitality, and commercial. The growth of this sector is well complemented by the growth of the corporate environment and the demand for office space as well as urban and semi-urban accommodations. The construction industry ranks third among the 14 major sectors in terms of direct, indirect and induced effects in all sectors of the economy.

It is also expected that this sector will incur more non-resident Indian (NRI) investments in both the short term and the long term. Bengaluru is expected to be the most favoured property investment destination for NRIs, followed by Ahmedabad, Pune, Chennai, Goa, Delhi and Dehradun.

Market Size

The Indian real estate market is expected to touch US\$ 180 billion by 2020. The housing sector alone contributes 5-6 per cent to the country's Gross Domestic Product (GDP).

In the period FY2008-2020, the market size of this sector is expected to increase at a Compound Annual Growth Rate (CAGR) of 11.2 per cent. Retail, hospitality and commercial real estate are also growing significantly, providing the much-needed infrastructure for India's growing needs.

The private equity investments in real estate increased 26 per cent to a nine-year high of nearly Rs 40,000 crore (US\$ 6.01 billion) in 2016.

Sectors such as IT and ITeS, retail, consulting and e-commerce have registered high demand for office space in recent times. The office space absorption in 2016 across the top eight cities amounted to 34 million square feet (msf) with Bengaluru recording the highest net absorption during the year. Information Technology and Business Process Management sector led the total leasing table with 52 per cent of total space uptake in 2016. Mumbai is the best city in India for commercial real estate investment, with returns of 12-19 per cent likely in the next five years, followed by Bengaluru and Delhi-National Capital Region (NCR).

INDIAN REAL ESTATE: A NEW PARADIGM ON ANVIL

Real estate has been a key driver for the economy. However, poor transparency in the sector and dwindling consumer confidence had put the industry under strain in the past 3 to 4 years. The recent introduction of the Real Estate (Regulation and Development) Act, 2016 has pumped in a new lease of life into the sector. It is expected to weed out unorganised players from the industry and whip up buyers' confidence bringing buoyancy back into the sector. The subsequent stride in re-engineering momentum back into the sector was the governments push towards 'affordable housing'. By giving it infrastructure status the government would attract private developers towards these projects. At the same time home loan sops and interest subsidies under the Pradhan Mantri Awas Yojna would fire up the demand for these homes. The expected increase in transparency due to implementation of RERA and formalisation of sector with the implementation of GST, the sector would aid the sector in getting access to variety of formal sources of finance. These reforms will go a long way in enticing the institutional investors to invest in this sector.

The government's emphasis on housing and its efforts to mitigate the risks in the real estate sector by introduction of RERA has not gone unnoticed by foreign institutional investors and also the sovereign and pension funds. A large number of these investors and funds have made changes to the portfolio allocation strategy allowing investment exposure to Indian real estate. The pension and private equity funds are investing in commercial assets (office spaces and malls) and also in under-construction residential properties. Players such as Qatar Holdings, CPPIB, Blackstone, Ivanhoe Cambridge, APG and Xander are readying blueprints for longterm investments in the realty segment. Not just foreign investors even the domestic investors are raising funds to invest in this sector.

The past 3-4 years have been an extremely stressful period for the Indian real estate with markets being subdued in terms of launches and sales across major metros. However, this year is expected to be the year of inflection with new

regulations coming into place. These regulations and reforms would herald the industry into its next wave of growth. Right from buying of land, funding of projects to delivery of the final product to the buyer, the entire process is going to witness a drastic change.

Despite subdued financial performance of the realty companies over the past few years, the share price of the companies and also the BSE Realty index has outperformed the market. The share performance is generally the leading indicator of how the sector is going to perform in the near future. The reality index has outperformed the market over the past year. The government has realized the potential of this sector to create jobs and also drive the GDP growth of the country. Hence it has been trying its best to revive the sector. It would be just a matter of time before this sector realizes and starts delivering on its full potential.

SEGMENTS IN THE INDIAN REAL ESTATE SECTOR

• Residential space

Residential segment contributes ~80 per cent of the real estate sector. Total residential unit launches stood at around 1,08,200.

• Commercial space

- > Few players with presence across India.
- > The office space absorption in 2016 across the top eight cities amounted to 34 million square feet (msf).

Retail space

- FDI in multi brand retail to boost demand.
- Supply of retail space stood at 3.4 million sq ft in 2016.
- > The retail segment in the real estate sector attracted an investment of over \$700 million in 2016.

Hospitality space

As of 30 July 2015, the country had 972 approved hotels with 63715 rooms.

• SEZs

- As of FY16, the government has formally approved 415 SEZs, of which 205 are in operation.
- ➤ Majority of the SEZs are in the IT/ ITeS sector.

RESIDENTIAL SEGMENT

- After the tumultuous H2 2016 when the demonetisation needle punctured the market pulling down residential sales and launches by 46% and 23% respectively, H1 2017 has ushered as an eventful period.
- The first two months of H1 2017 saw consumers and the industry as a whole grapple with the aftermath of demonetisation. While activity encouragingly picked up in March and April, May 1 earmarked the dawn of the single largest change in history of Indian real estate industry through the implementation of the Real Estate (Regulation and Development) Act 2016.
- After the initial dilemma regarding the implementation of the RERA, largely all stakeholders have reconciled to the fact that RERA will be a reality sooner than later. With developers re-directing efforts from launches to RERA compliance, pace of launches was lower in H1 2017.
- In the backdrop of these landmark events this performance has also been dictated by the developers baggage of unsold inventory, which until a year ago was mainly in the under construction category. However, now 'ready for possession' apartments are also available across markets. With ready projects kept outside the ambit of RERA, developers have been focusing heavily on sales of their ready possession stock.

(Source: Knight Frank Report, Indian Real Estate, Residential and Office, January – June 2017)

(Source: Knight Frank Report, Indian Real Estate, Residential and Office, January – June 2017)

- The impetus to the realty market particularly the residential market has come with government's focused attention to the affordable housing segment. Over the last year the government has announced a series of measures to revive a fresh lease of life into this segment of market.
- We believe that the focus on affordable housing is a structural change and the supply side response to this focus area implies that it is going to be a sustainable theme going forward. The latest set of numbers indicate that the share of less than ₹ 2.5 mn ticket size housing that had risen from 17% in H1 2016 to 20% in H2 2016, has further jumped in the latest H1 2017 period to 36%. The category of housing valued at less than INR 5 mn is now as much as 71% across the top 8 cities, substantially higher than the 52% share in H1 2016.
- With this backdrop, residential launches in the top eight cities of the country declined by 41% to 62,738 units in H1 2017 compared to 1,07,120 units in H1 2016. The decline was 9% compared to the demonetisation period of H2 2016 when 68,702 units were launched. Ahmedabad and NCR wore the worst hit with launches falling by 79% and 73% respectively.
- With consumers opening up to the confidence infused by RERA and a slew of government measures towards affordable housing, sales decline was not as severe as noticed in launches. Sales during H1 2017 declined by 11% to 1,20,756 units in H1 2017 compared to 1,35,016 units in H1 2016. Sequentially, however, the sales are 11% better compared to the demonetisation period of H2 2016 when 1,09,159 units were sold.

- Unsold inventory levels at 5,96,044 units in H1 2017 are 10% lower than 6,60,239 units in H1 2016 and are
 consistently trending lower compared to its peak of in H2 2014. However, the numbers are lower mainly on
 account of the shrinking market size.
- With the baggage of unsold inventory and the state of the residential property market, weighted average property
 price has stagnated. Developers in most markets have been forthcoming in offering freebies and discount for sales
 closure.

(Source: Knight Frank Report, Indian Real Estate, Residential and Office, January – June 2017)

OFFICE MARKET SEGMENT

- Office market fundamentals across the country remain tight with vacancy levels hitting new lows for the 11th straight period as the supply crunch shows little sign of abating with any meaningful impact.
- The supply crunch that has hamstrung the market and macro headwinds in the form of the slowdown in the IT/ ITeS spending by Europe and USA has weighed down office space demand and caused a 10% decline YoY in transaction levels during H1 2017 compared to a 13% growth in the previous reference period.
- The 10% decline in transaction levels translates to 18.1 mn sq ft of office space being taken up across the six office space markets during H1 2017. A similar 5% decline in supply saw 17.9 mn sq ft come online in the same period. (Source: Knight Frank Report, Indian Real Estate, Residential and Office, January June 2017)

Investments

The Indian real estate sector has witnessed high growth in recent times with the rise in demand for office as well as residential spaces.  well as commercial office projects.

 Co LP to invest Rs 435 crore (US\$ 65.25 million) in a 66-acre residential township, being developed by SARE
 Homes in Gurgaon.
- Gurgaon-based property search aggregator Square Yards Consulting Pvt Ltd has raised US\$ 12 million from the
 private equity arm of Reliance Group for strengthening its team and expanding its presence to more than 25
 countries.
- Rising Straits Capital plans to raise US\$ 100 million to capitalise its real estate-focused non-banking financial company (NBFC), Rising Straits Finance Co. Pvt. Ltd.
- A joint venture between Dutch asset manager APG Asset Management and real estate asset platform Virtuous Retail, has acquired a portfolio of three shopping malls for US\$ 300 million, and has committed an additional US\$ 150 million as equity capital to expand the portfolio.
- Macquarie Infrastructure and Real Assets (MIRA) and Tata Housing Development Co. Ltd have entered into a 70:30 partnership to invest Rs 1,400 crore (US\$ 210 million) and Rs 600 crore (US\$ 90 million) respectively in high-end residential property projects, starting with four major cities of Mumbai, NCR, Bengaluru and Pune.
- Qatar Holdings LLC, a subsidiary of Qatar Investment Authority, has committed to invest US\$ 250 million in the affordable housing fund of Arthveda Fund Management Pvt Ltd.
- Piramal Realty, the real estate division of Piramal Group, plans to invest Rs 1,800 crore (US\$ 270.14 million) in an eight acre project named Piramal Revanta in Mulund, Mumbai.
- Ivanhoe Cambridge, the real estate arm of Canada's second largest pension fund manager Caisse de dépôt et placement du Québec (CDPQ), plans to enter into a Joint Venture (JV) agreement with Piramal Fund Management to set up a US\$ 250 million venture, which will provide equity capital to developers of residential projects in the country.

Government Initiatives

The Government of India along with the governments of the respective states has taken several initiatives to encourage the development in the sector. The Smart City Project, where there is a plan to build 100 smart cities, is a prime opportunity for the real estate companies. Below are some of the other major Government Initiatives:

- The Delhi Government has declared 89 out of 95 villages in Delhi as urban areas which will ease the operationalising of the land pooling policy, thereby giving a boost to affordable housing in Delhi.
- The Reserve Bank of India (RBI) has proposed to allow banks to invest in real estate investment trusts (REITs) and infrastructure investment trusts (InvITs) which is expected to benefit both real estate and banking sector in diversifying investor base and investment avenues respectively.
- The Ministry of Housing and Urban Poverty Alleviation has sanctioned the construction of 84,460 more affordable houses for urban poor in five states, namely West Bengal, Jharkhand, Punjab, Kerala and Manipur under the Pradhan Mantri Awas Yojana (Urban) scheme with a total investment of Rs 3,073 crore (US\$ 460 million).

Road ahead

The Securities and Exchange Board of India (SEBI) has given its approval for the Real Estate Investment Trust (REIT) platform which will help in allowing all kinds of investors to invest in the Indian real estate market. It would create an opportunity worth Rs 1.25 trillion (US\$) in the Indian market over the years. Responding to an increasingly well-informed consumer base and, bearing in mind the aspect of globalisation, Indian real estate developers have shifted gears and accepted fresh challenges. The most marked change has been the shift from family owned businesses to that of professionally managed ones. Real estate developers, in meeting the growing need for managing multiple projects across cities, are also investing in centralised processes to source material and organise manpower and hiring qualified professionals in areas like project management, architecture and engineering.

The growing flow of FDI into Indian real estate is encouraging increased transparency. Developers, in order to attract funding, have revamped their accounting and management systems to meet due diligence standards. (Source: https://www.ibef.org/industry/real-estate-india.aspx)

Being the geographical centre of India, Nagpur is fast becoming the top choice of investors for putting in capital into the city's commercial and residential infrastructure. Being rated as the top city in terms of general quality of life, health services, greenery and public transportation has helped it make a niche in the market formerly dominated by the metropolitan cities.

OUR STRATEGY

Balanced revenue generation model for cash flow visibility

We intend to maintain a balance of assets developed for sale and assets developed for ownership by us and leased to third parties to enable us to achieve steady and visible cash flow and better manage cyclical risks. We believe that our leased properties provide us with a stable income stream which helps to compensate for volatility in sales of our residential and other projects for sale. In determining the proportion of assets to be retained by us, we consider a number of factors, such as prevailing and expected market conditions, the strategic nature and location of the asset, and cash flow and other needs of our business.

Enhance our project execution capabilities

We intend to focus on enhancing project execution capabilities so as to derive twin benefits of customer's satisfaction and improvements in operating margins. We believe that we have developed a reputation for undertaking challenging real estate projects and will continue. Our ability to effectively manage projects will be crucial to our continued success as a real estate Company to do so in near future.

Flexibility in capital investment and mode of development

We focus on acquiring land for development in the near- to medium-term. While we have purchased and will continue to purchase land for development by making upfront payments for the land, we also look to develop projects through alternative structures that reduce our upfront capital commitment. We have developed a strategy in where we mitigated the risk by paying for the land partly in cash and partly in constructed area. We believe that such development strategies enable our joint venture partner to get more value out of his land as our brand and the quality of our product are able to add value to their property and in turn enable us to access quality land to develop and sell without significant capital investment.

Exploring Properties and Focus on Hospital Infrastructure

There is tremendous demand for hospitals in India and there is a gap between the availability of beds and required beds. Due to increasing medical tourism, there is a need to upgrade service standards and provide state-of-the-art facilities to bring service levels on par with global standards. This demand has created excellent opportunities for investors. India is also witnessing growth in the medical infrastructure sector, including advanced diagnostic equipment. We intend to focus on identifying and acquiring real estate assets in Pune, Nagpur and rest of the Vidarbha. Accordingly, we intend to continue tofocus on our strategy of developing hospital infrastructure in Pune, Nagpur and rest of the Vidarbha and develop a brand associated with quality, track-record of successful execution and value for money.

Continue to strengthen relationships with key service providers

We intend to continue to follow our outsourcing model and further strengthen our relationships with key service providers such as architects and contractors. This will enable our management to focus more on our core business by continuing to outsource the design and construction to our service providers. We also believe that our outsourcing model will enable us to develop projects with quality design and construction as we are able to access the best service providers in their respective fields to create the type of projects that we believe our customers want in Nagpur and in other parts of India. With dedicated and prudent business practices and processes, we endeavour to construct landmark projects across India's landscape that not only meets, but exceeds the expectations of our customers, business partners, stakeholders as well as the society at large.

We do our in-house market research, wherein we gather relevant market data; assess the potential of a location after evaluating its demographic trends and identifying relevant government schemes and incentives.

3. Project Planning, Regulatory Approvals

The project planning and execution process commences with obtaining the requisite regulatory approvals, environmental clearances and location specific approvals. While evaluating the feasibility of an area for the implementation of a project, it is critical to understand and comply with the regulations governing land development at the location. The approvals generally required for the development of a property include change of land use, approvals of building plans, layouts and infrastructure facilities such as power and water. Deferred tax assets are recognized only to the extent there is reasonable certainty that the assets can be realized in future. However, where there is unabsorbed Depreciation or carry forward of losses, deferred tax assets are recognized only if there is a virtual certainty of realization of such assets. Deferred tax assets are revised at each Balance Sheet date & written down or written up to reflect the amount that is reasonably / virtually certain (as case may be) to be realized.

iv) Earnings per share

Basic earnings per share are calculated by dividing the net profit or loss for the year attributable to equity shareholders by the weighted average number of equity shares outstanding during the year.

For the purpose of calculating diluted earnings per share, the net profit or loss for the year attributable to equity shareholders and the weighted average number of shares outstanding during the year are adjusted for the effects of all dilutive potential equity shares.

v) Provisions, Contingent Liability and Contingent Assets:

A provision is recognized when the Company has a present obligation as a result of past event; it is probable that an outflow of resources will be required to settle the obligation, in respect of which a reliable estimate can be made. These are reviewed at each balance sheet date and adjusted to reflect the current best estimates.

Contingent liabilities are disclosed when there is a possible obligation arising from past events, the existence of which will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Company. A present obligation that arises from past events where it is either not probable that an outflow of resources will be required to settle or reliable estimate of the amount cannot be made, is also termed as contingent liability. A contingent asset is neither recognized nor disclosed in the financial statements.

vi) Cash and cash equivalents

Cash and cash equivalents comprise cash at bank and in hand and short-term investments with balance maturity period of three months or less as on the balance sheet date.

COMPETITION

The real estate market is highly competitive and fragmented. We face competition from various national and regional real estate developers. Some of our competitors have greater financial, marketing, sales and other resources than we do. Moreover, as we seek to diversify into new geographical areas, we face the risk that some of our competitors have a wider geographical reach while some other competitors have a strong presence in regional markets. Our competitors include both large and small real estate developers in the regions and areas where we operate.

Significant Developments after June 30, 2017 that may affect our Future Results of Operations

The Directors confirm that there have been no events or circumstances since the date of last financial statements as disclosed in the Prospectus which materially or adversely affect or is likely to affect the profitability of our company, or the value of our assets, or our ability to pay liabilities within next twelve months.

FACTORS AFFECTING OUR RESULT OF OPERATIONS

Except as otherwise stated in the prospectus and the Risk Factors given in the prospectus, the following important factors could cause actual results to differ materially from the expectations include, among others:

Revenue recognition and progress of construction and development

Our revenue recognition is based on the type of development and the number of projects that are under execution during a particular period and those that qualify for revenue recognition in accordance with our accounting policy. For the properties we intend to sell, we follow the POC Method of revenue recognition. Under this method, our revenue from sales depends upon the volume of bookings we are able to obtain for our developments as well as the progress of construction of our projects. Our bookings depend upon our ability to identify suitable types of developments that will meet customer preferences and market trends, and to market our projects. Further, our ability to recognize revenue and profits also depends on our customers paying us the remaining amounts due under contract, after the payment of initial deposit.

The POC Method is applicable to developments that we intend to sell and for which we have entered into a sale agreement prior to completion of construction; it is not applicable to developments that we intend to lease. Accordingly, for projects to which the POC Method of revenue recognition is applicable, the faster we are able to construct and execute our projects, the sooner we can commence recognition of revenue. The extent of revenue recognition is also dependent on the volume of sales. This may result in uneven distribution of our revenues.

Further, we recognize revenues based on estimated costs and it is not certain whether these estimates will require further adjustments based on the actual cost incurred with respect to a particular project. The effect of such changes to estimates is recognized in the financial statements of the period in which such changes are determined. This may lead to significant fluctuations in revenue recognition.

The time it takes to develop a project varies depending on a variety of factors, including the size of a project. The rate of construction progress depends on various factors, including the availability of labour and raw materials, the prompt receipt of regulatory clearances, access to utilities such as electricity and water, and the absence of contingencies such as litigation (including adverse title claims) and adverse weather conditions. These factors may cause significant fluctuations in our revenues from period to period.

A combination of the factors discussed above may result in significant variations in our revenues and profits, and our financial position in a particular period may not accurately reflect our level of activity in that period. Similarly, our level of activity for a particular period may not accurately reflect our financial position in that Period.

Construction and labour costs

Construction costs include the cost of raw materials, such as steel, cement, mechanical, electrical, plumbing and finishing materials as well as payments to construction contractors. Material prices, can be volatile and are subject to factors affecting the Indian and international commodity markets that are beyond our control, including general economic conditions, competition, production levels, transportation costs and import duties. The prices of steel, cement and other inputs have remained volatile in the past three years. The availability and cost of labour also affects our business. The timing and quality of construction of the projects we develop depends on the availability and skill of contractors, their manpower and consultants, as well as contingencies affecting them, including labour and raw material shortages and industrial action such as strikes and lockouts. Further, our ability to develop a project within the intended timeframe, at the intended cost and up to the appropriate standard of quality is dependent on the satisfactory performance of our contractors.

Cost of third party contractors, architects and consultants

We outsource the design and construction of our projects. The progress and quality of construction of the projects we develop depends on the availability and skill of our contractors and consultants, as well as contingencies affecting them, including labour and industrial actions such as strikes and lockouts. Such labour and industrial actions may cause significant delays to the construction timetables for our projects, and we may therefore be required to find replacement contractors and consultants at higher cost. As a result, any increase in prices resulting from higher construction costs could adversely affect our profit margins, demand for our projects and the relative affordability of our projects as compared to our competitors 'products.

Variations in prices for our properties

The prices of our properties are determined principally by market forces of supply and demand. We typically price our sales and lease properties by reference to market rates for similar types of properties in their locality and the type of amenities and infrastructure provided by us in those projects. The sales and rental prices of our properties therefore depend on the location, number, square footage and mix of properties we sell or rent during each financial period, and on prevailing market supply and demand conditions at the time we complete development of our real estate projects. Supply and demand conditions in the real estate market in the areas in which we operate, and hence the prices we may charge for our properties, are affected by various factors outside our control, including prevailing economic, income and demographic conditions, interest rates available to clients requiring financing, the availability of comparable properties completed or under construction, changes in governmental policies relating to zoning and land use, changes in applicable regulatory framework, and competition from other real estate development firms.

Ability to secure new tenancies and renew existing lease arrangements in relation to commercial and retail developments

We earn income from the lease of commercial and properties, and from providing utilities and facility management services to our tenants. Our growth and success will therefore depend on our ability to anticipate the future needs and expansion plans of potential tenants, the provision of high quality office to attract and retain tenants who are willing and able to pay rent at suitable levels that we determine as well as the supply of, and lease income for, similar properties in such areas.

General economic conditions may adversely affect the financial stability of our tenants and prospective tenants and the demand for our commercial real estate. Educational Institutions and Colleges constitute a significant proportion of our commercial tenant base. Any adverse effects on the Education sectors in India or may have a negative impact on our operations.

Revenue Generation

Revenue from constructed properties for all projects is recognized in accordance with the provisions of Accounting Standard (AS) 9 on Revenue Recognition, read with Guidance Note on "Recognition of Revenue by Real Estate Developers". Revenue is computed on the units for which sale deed has been executed/ agreement to sale with possession has been given during the year based on the "percentage of completion method" and on the percentage of actual project costs incurred thereon to total estimated project cost, subject to such actual cost incurred being 40 per cent or more of the total estimated project cost on the units.

Revenue is recognized in accordance with the Revised Guidance Note issued by Institute of Chartered Accountants of India ("ICAI") on "Accounting for Real Estate Transactions (Revised 2012)".

Our ability to successfully implement its strategy and its growth and expansion plans

Our growth plans are considerable and would put significant demands on our management team and other resources. Any delay in implementation of our strategy and growth and expansion plans could impact our Company's roll out schedules and cause cost and time over runs.

General economic and business conditions

As a Company with its complete operations in India, we are affected by general economic conditions in the country and in particular economic factors that affect debt syndication industry in India. India's gross domestic product, or GDP, has been and will continue to be of importance in determining our operating results and future growth

Certain details pertaining to the percentage of Issue size available for allocation to each category is disclosed overleaf of the Bid cum Application Form and in the Prospectus. For details in relation to allocation, the Applicant may refer to the Prospectus.
- b) Under-subscription in any category (except QIB Category) is allowed to be met with spill over from any other category or combination of categories at the discretion of the Issuer and in consultation with the BRLMs and the Designated Stock Exchange and in accordance with the SEBI ICDR Regulations, 2009. Unsubscribed portion in QIB Category is not available for subscription to other categories.
- c) In case of under subscription in the Issue, spill-over to the extent of such under-subscription may be permitted from the Reserved Portion to the Issue. For allocation in the event of an under-subscription applicable to the Issuer, Applicants may refer to the Prospectus.
- d) Illustration of the Book Building and Price Discovery Process Bidders should note that this example is solely for illustrative purposes and is not specific to the Issue; it also excludes Bidding by Anchor Investors.
 - Bidders can bid at any price within the Price Band. For instance, assume a Price Band of ₹ 20 to ₹ 24 per share, Issue size of 3,000 Equity Shares and receipt of five Bids from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

Bid Quantity	Bid Amount (₹)	Cumulative Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%
1,500	22	3,000	100.00%
2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

The price discovery is a function of demand at various prices. The highest price at which the Issuer is able to Issue the desired number of Equity Shares is the price at which the book cuts off, i.e., ₹ 22.00 in the above example. The Issuer in consultation with the BRLM, may finalise the Issue Price at or below such Cut-Off Price, i.e., at or below ₹ 22.00. All Bids at or above this Issue Price and cut-off Bids are valid Bids and are considered for allocation in the respective categories.

e) Alternate Method of Book Building

In case of FPOs, Issuers may opt for an alternate method of Book Building in which only the Floor Price is specified for the purposes of Bidding ("Alternate Book Building Process").

The Issuer may specify the Floor Price in the Prospectus or advertise the Floor Price at least one Working Day prior to the Issue Opening Date. QIBs may Bid at a price higher than the Floor Price and the Allotment to the QIBs is made on a price priority basis. The Bidder with the highest Bid Amount is allotted the number of Equity Shares Bid for and then the second highest Bidder is Allotted Equity Shares and this process continues until all the Equity Shares have been allotted. RIIs, NIIs and Employees are Allotted Equity Shares at the Floor Price and Allotment to these categories of Bidders is made proportionately. If the number of Equity Shares Bid for at a price is more than available quantity then the Allotment may be done on a proportionate basis. Further, the Issuer may place a cap either in terms of number of specified securities or percentage of issued capital of the Issuer that may be Allotted to a single Bidder, decide whether a Bidder be allowed to revise the bid upwards or downwards in terms of price and/or quantity and also decide whether a Bidder be allowed single or multiple bids.

SECTION 6: ISSUE PROCEDURE IN FIXED PRICE ISSUE

Applicants may note that there is no Bid cum Application Form in a Fixed Price Issue. As the Issue Price is mentioned in the Fixed Price Issue therefore on filing of the Prospectus with the RoC, the Application so submitted is considered as the Application Form.

The Application Form is also made available on the websites of the Stock Exchanges at least one day prior to the Bid/Issue Opening Date.

In a fixed price Issue, allocation in the net issue to the public category is made as follows: minimum fifty per cent to Retail Individual Investors; and remaining to (i) individual investors other than Retail Individual Investors; and (ii) other Applicants including corporate bodies or institutions, irrespective of the number of specified securities applied for. The unsubscribed portion in either of the categories specified above may be allocated to the Applicants in the other category.

7.1 ALLOTMENT TO RIIs

Bids received from the RIIs at or above the Issue Price may be grouped together to determine the total demand under this category. If the aggregate demand in this category is greater than the allocation to in the Retail Category at or above the Issue Price, then the maximum number of RIIs who can be Allotted the minimum Bid Lot will be computed by dividing the total number of Equity Shares available for Allotment to RIIs by the minimum Bid Lot ("Maximum RII Allottees"). The Allotment to the RIIs will then be made in the following manner:

- a) In the event the number of RIIs who have submitted valid Bids in the Issue is equal to or less than Maximum RII Allottees, (i) all such RIIs shall be Allotted the minimum Bid Lot; and (ii) the balance available Equity Shares, if any, remaining in the Retail Category shall be Allotted on a proportionate basis to the RIIs who have received Allotment as per (i) above for the balance demand of the Equity Shares Bid by them (i.e. who have Bid for more than the minimum Bid Lot).
- b) In the event the number of RIIs who have submitted valid Bids in the Issue is more than Maximum RII Allottees, the RIIs (in that category) who will then be Allotted minimum Bid Lot shall be determined on the basis of draw of lots.

7.2 ALLOTMENT TO NIIs

Bids received from NIIs at or above the Issue Price may be grouped together to determine the total demand under this category. The Allotment to all successful NIIs may be made at or above the Issue Price. If the aggregate demand in this category is less than or equal to the Non-Institutional Category at or above the Issue Price, full Allotment may be made to NIIs to the extent of their demand. In case the aggregate demand in this category is greater than the Non-Institutional Category at or above the Issue Price, Allotment may be made on a proportionate basis up to a minimum of the Non-Institutional Category.

7.3 ALLOTMENT TO QIBs

For the Basis of Allotment to Anchor Investors, Applicants may refer to the SEBI ICDR Regulations, 2009 or Prospectus. The QIB Category may be available for Allotment to QIBs who have Bid at a price that is equal to or greater than the Issue Price. Allotment may be undertaken in the following manner:

- a) In the first instance allocation to Mutual Funds for up to 5% of the QIB Category may be determined as follows: (i) In the event that Bids by Mutual Fund exceeds 5% of the QIB Category, allocation to Mutual Funds may be done on a proportionate basis for up to 5% of the QIB Category; (ii) In the event that the aggregate demand from Mutual Funds is less than 5% of the QIB Category then all Mutual Funds may get full Allotment to the extent of valid Bids received above the Issue Price; and (iii) Equity Shares remaining unsubscribed, if any and not allocated to Mutual Funds may be available for Allotment to all QIBs as set out at paragraph 7.4(b) below;
- b) In the second instance, Allotment to all QIBs may be determined as follows: (i) In the event of oversubscription in the QIB Category, all QIBs who have submitted Bids above the Issue Price may be Allotted Equity Shares on a proportionate basis for up to 95% of the QIB Category; (ii) Mutual Funds, who have received allocation as per (a) above, for less than the number of Equity Shares Bid for by them, are eligible to receive Equity Shares on a proportionate basis along with other QIBs; and (iii) Under-subscription below 5% of the QIB Category, if any, from Mutual Funds, may be included for allocation to the remaining QIBs on a proportionate basis.

7.4 ALLOTMENT TO ANCHOR INVESTOR (IF APPLICABLE)

Anchor Investors are then required to pay any additional amounts, being the difference between the Issue Price and the Anchor Investor Issue Price, as indicated in the revised CAN within the pay-in date referred to in the revised CAN. Thereafter, the Allotment Advice will be issued to such Anchor Investors.
- d) In the event the Issue Price is lower than the Anchor Investor Issue Price: Anchor Investors who have been Allotted Equity Shares will directly receive Allotment Advice.

7.5 BASIS OF ALLOTMENT FOR QIBs (OTHER THAN ANCHOR INVESTORS), NIIs AND RESERVED CATEGORY IN CASE OF OVER-SUBSCRIBED ISSUE

In the event of the Issue being over-subscribed, the Issuer may finalise the Basis of Allotment in consultation with the Designated Stock Exchange in accordance with the SEBI ICDR Regulations, 2009.

The allocation may be made in marketable lots, on a proportionate basis as explained below:

- a) Bidders may be categorized according to the number of Equity Shares applied for;
- b) The total number of Equity Shares to be Allotted to each category as a whole may be arrived at on a proportionate basis, which is the total number of Equity Shares applied for in that category (number of Bidders in the category multiplied by the number of Equity Shares applied for) multiplied by the inverse of the over-subscription ratio;
- c) The number of Equity Shares to be Allotted to the successful Bidders may be arrived at on a proportionate basis, which is total number of Equity Shares applied for by each Bidder in that category multiplied by the inverse of the over-subscription ratio;
- d) In all Bids where the proportionate Allotment is less than the minimum Bid Lot decided per Bidder, the Allotment may be made as follows: the successful Bidders out of the total Bidders for a category may be determined by a draw of lots in a manner such that the total number of Equity Shares Allotted in that category is equal to the number of Equity Shares calculated in accordance with (b) above; and each successful Bidder may be Allotted a minimum of such Equity Shares equal to the minimum Bid Lot finalised by the Issuer;
- e) If the proportionate Allotment to a Bidder is a number that is more than the minimum Bid lot but is not a multiple of one (which is the marketable lot), the decimal may be rounded off to the higher whole number if that decimal is 0.5 or higher. If that number is lower than 0.5 it may be rounded off to the lower whole number. Allotment to all Bidders in such categories may be arrived at after such rounding off; and
