2. Our business will suffer if we fail to anticipate and develop new services and enhance existing services in order to keep pace with rapid changes in technology and the industries on which we focus.

The IT services market is characterised by rapid technological changes, evolving industry standards, changing client preferences, and new product and service introductions that could result in product obsolescence and short product life cycles. Our future success will depend on our ability to anticipate these advances, enhance our existing product offerings or develop new service offerings to meet client needs, in each case, in a timely manner. We may not be successful in anticipating or responding to these advances on a timely basis, or at all. If we do respond, the products or services we develop may not be successful in the marketplace. We may also be unsuccessful in stimulating customer demand for new and upgraded services, or seamlessly managing new service introductions or transitions. Our failure to address the demands of the rapidly evolving IT environment, particularly with respect to emerging technologies, and technological obsolescence, could have a material adverse effect on our business, results of operations and financial condition. In addition, our success also depends on our ability to proactively manage our portfolio of technology alliances.

Additionally, during the regular course of operating our business, we may adjust our future plans as a result of our research, experience, technology evolution and market demand. Accepting unforeseen business opportunities may also result in a business model change. We cannot guarantee that any adjustment in our future plans will become successful or be more successful than our current business model. A shift in our plans may result in the use of other technologies. Other technologies may in the future prove to be more efficient and/or economical to us than our current technologies. We cannot guarantee that any change in technology will become successful or be more successful than our current technology.

3. Intense competition in the market for technology services could affect our pricing, which could reduce our share of business from clients and decrease our revenues and profitability.

We operate in an intensely competitive industry that experiences rapid technological developments, changes in industry standards, and changes in customer requirements. Our competitors include large IT consulting firms, captive divisions of large multinational technology firms, large Indian IT services firms, in-house IT departments of large corporations, in addition to numerous smaller local competitors in the various geographic markets in which we operate. The technology services industry is experiencing rapid changes that are affecting the competitive landscape. We may face competition from companies that increase in size or scope as the result of strategic mergers or acquisitions, which may result in larger competitors with significant resources that benefit from economies of scale and scope. These transactions may include consolidation activity among global technology majors, hardware manufacturers, software companies and vendors, and service providers. The result of any such vertical integration may be greater

integration of products and services and a larger portfolio of services on offer, in each case, relative to what was previously offered by such independent vendors. Our access to such products and services may be reduced as a result of such an industry trend and we may otherwise become disadvantaged relative to our potentially more circumscribed service portfolio.

Such events could have a variety of negative effects on our competitive position and our financial results, including reducing our revenue, increasing our costs, lowering our gross margin percentage and requiring us to recognise impairments on our assets. If we are unable to provide our clients with superior services and solutions at competitive prices or successfully market those services to current and prospective clients, our business, results of operations and financial condition may suffer.

4. *Inability to optimally price our services may adversely affect our business, financial condition and results of operations.*

Our business model provides for clients to pay part payments. If we are not able to predict the most optimal route or change customer prices, we may be unable to unwilling to pass these increases to our customers, which could adversely affect our business, results of operations and financial condition.

Further, as competitors introduce new products or services that compete with ours or reduce their prices, we may be unable to attract new customers or retain existing customers based on our historical pricing. As we expand in newer geographies, we also must determine the appropriate price to enable us to compete effectively internationally.

5. *Our pricing structures do not accurately anticipate the cost and complexity of performing our work and if we are unable to manage costs successfully, then certain of our contracts could be or become unprofitable.*

We negotiate pricing terms with our clients utilising a range of pricing structures and conditions. Depending on the particular contract, we may use time-and-materials pricing, pursuant to which we typically invoice on a monthly basis for the services that we provide to our clients. We may also enter into fixed-price arrangements, pursuant to which we provide a defined scope of work over a fixed timeline for a capped fee. In certain instances, we may enter into time-and-materials pricing arrangements, but with the inclusion of fixed-price elements for certain specified services.

Our ability to improve or maintain our profitability is dependent on managing our costs successfully. Our cost management strategies include maintaining appropriate alignment between the demand for our services and our resource capacity, optimising the costs of service delivery through business process digitalisation and deployment of tools, and effectively leveraging our sales and marketing and general and administrative costs. We also have to manage additional costs to replace or upgrade our products or services in the event our clients are not satisfied in relation thereto and believe we have failed to properly understand their needs and develop solutions accordingly. Our pricing structure is highly dependent on our internal forecasts and predictions about our projects and the potential demand for our projects and services by our clients, which might be based on limited data and could be inaccurate. Although we use our specified software engineering processes and rely on our past project experience to reduce the risks associated with estimating, planning and performing fixed-price projects, we bear the risks of cost overruns, completion delays and wage inflation in connection with these projects. There is no guarantee that these, or other cost-management efforts, will be successful, that our efficiency will be enhanced, or that we will achieve desired levels of profitability.

If we do not accurately estimate the resources required, costs and timing for completing projects, future rates of wage inflation and currency exchange rates, or if we fail to complete our contractual obligations within the contracted timeframe, our contracts could prove unprofitable for us or yield lower profit margins than anticipated. There is a risk that we will underprice our contracts, fail to accurately estimate the costs of performing the work or fail to accurately assess the risks associated with potential contracts. In particular, any increased or unexpected costs, or wide fluctuations compared to our original estimates or delays, or unexpected risks we encounter in connection with the performance of this work, including those caused by factors outside of our control, could make these contracts less profitable or unprofitable, which could adversely impact our profit margin.

6. *Failure to meet the level of performance in accordance with our contracts with customers could adversely affect our business, financial condition and results of operations.*

We use complex and utilise sophisticated software and hardware systems for providing our services and solutions to our customers. Such software and hardware systems may suffer operational errors or performance problems. We have entered into contracts with some of our customers which contain provisions requiring us to maintain the services at or above certain minimum performance standards. Under these contracts, if we fail to meet the specified standards, we may be subject to liquidated damages or penalties, and in certain cases, termination of the contracts by our customers. We cannot assure you that in case any claims for damages are made by our customers, the limitations on liability we provide for in our service contracts will be enforceable, or that they will otherwise be sufficient to protect us from liability for damages.

7. *We are subject to risks associated with expansion into new markets.*

Expansion into new markets, including in India and overseas, subjects us to various challenges, including those relating to our lack of familiarity with the culture, legal regulations and economic conditions of these new regions, language barriers, difficulties in staffing and managing such operations, and the lack of brand recognition and reputation in such regions. The risks involved in entering new geographic markets and expanding operations, may be higher than expected, and we may face significant competition in such markets.

By expanding into new markets, we could be subject to additional risks associated with establishing and conducting operations, including:

- compliance with a wide range of laws, regulations and practices, including uncertainties associated with changes in laws, regulations and practices and their interpretation;
- local preferences and service requirements;
- fluctuations in foreign currency exchange rates;
- inability to effectively enforce contractual or legal rights and adverse tax consequences;
- differing accounting standards and interpretations;
- stringent as well as differing labour and other regulations;
- differing domestic and foreign customs, tariffs and taxes;
- exposure to expropriation or other government actions; and
- political, economic and social instability.

For further details, please refer to section titled "*Objects of the Issue*" beginning on page 59 of this Draft Letter of Offer. By expanding into new markets, we may be exposed to significant liability and could lose some or all of our investment in such regions, as a result of which our business, financial condition and results of operations could be adversely affected.

8. *We are exposed to foreign currency fluctuations risks which may have an adverse effect on our business, results of operations and financial conditions.*

The certain portion of the business is transacted in several currencies and consequently the Company is exposed to foreign exchange risks. Such business transactions may adversely affect our profitability in case the trade relations of India with any of the countries faces problems due to internal issues of their countries. Also, the exchange rate between the Indian Rupee and currencies of the countries with whom our company transacts business may fluctuate and adversely affect our results of operations. Depreciation of the Indian rupee against the U.S. Dollar and other foreign currencies may adversely affect our results of operations by increasing the cost of our product or any future capital expenditure in foreign currencies. Volatility in the exchange rate may negatively impact our cost of operations and operating results.

9. *We are dependent upon few customers for our business. Any reduction or interruption in the business of a key customer or a substantial decrease in orders placed by a key customer may have an adverse impact on the revenues and operations of our Company.*

We have a concentrated customer base and dependence on few customers making our business riskier. We do not have any long term arrangements with our customers. The loss of a major customer and/or reduction

in any of our key customers' sales, resulting in lower demand for our products and services and any material delay, cancellation or reduction of orders from any of our key customers would materially affect our business and financial condition. There is no assurance that we will be able to maintain historic levels of business from all the existing customers or to retain all the existing customers, or that we will be able to replace our customer base in a timely manner or at all. In the event our existing customers do not continue to purchase our products, it may affect our revenues and the financial condition of our Company.

10. The loss of services of our senior management could adversely affect our business and results of operations.

We are dependent on the experience and the continued efforts of the senior members of our management team, many of whom have been with us for an extended period of time. Our growth strategy will place significant demands on our management and other resources because it requires us to continue to improve operational, financial and other internal controls, both in India and overseas. We are dependent on executives and key personnel, including competent sales force as well as technology professionals with a detailed knowledge of our industry. The loss in the services of the members of our senior management and other key team members, particularly to competitors, or our failure to otherwise retain the necessary management and other resources to maintain and grow our business, may have an adverse effect on our results of operations, financial condition and prospects.

Our future success and our ability to maintain our competitive position and implement our business strategy are dependent to a large degree on our ability to identify, attract, train and retain personnel with skills that enable us to keep pace with growing demands and evolving industry standards and on the continued service and performance of our senior management team and other key team members in our business units.

Qualified individuals are in high demand and competition for qualified personnel in our industry is intense, and we may incur significant costs to retain or attract them. We may not be able to retain our existing personnel or attract and retain new personnel in the future. Many well qualified candidates may be subject to contractual non-compete clauses which may restrict our ability to employ them.

11. If we are unable to maintain and enhance our brand and increase market awareness of our Company and products, our business, results of operations and financial condition may be adversely affected.

We believe that maintaining and enhancing the "GlobalSpace" brand identity and increasing market awareness about us and our services and solutions, is critical to achieving widespread acceptance of our services and product, to strengthen our relationships with our existing customers and to our ability to attract new customers. The successful promotion of our brand will depend largely on our continued marketing efforts, our ability to continue to offer high quality services and solutions and to successfully differentiate our services, products and platform from competing products and services. Our brand promotion activities may not be successful or yield increased revenue. In addition, independent industry analysts often provide reviews of our services and competing products and services, which may significantly influence the perception of our services in the marketplace. If these reviews are negative or not as strong as reviews of our competitors' products and services, then our brand may be harmed.

The promotion of our brand also requires us to make substantial expenditures, and we anticipate that these expenditures will increase as our market becomes more competitive and as we expand into new markets. To the extent that these activities increase revenue, this revenue still may not be enough to offset the increased expenses we incur. If we do not successfully maintain and enhance our brand, then our business may not grow, we may see our pricing power reduced relative to competitors and we may lose customers, all of which would adversely affect our business, results of operations and financial condition.

12. Our investments in technology, especially our research and development activities, may not yield the intended results, which may adversely affect our financial condition and results of operations.

We may invest in newer technologies, including, technologies to enhance our R&D capabilities. Our focus areas currently include software product development programme. Our choice of focus areas and investments in technology and human capital for R&D are based on the management's perception of our industry. We cannot assure you that such investments will yield the intended results. Our inability to achieve intended results from our investments in R&D may adversely affect our financial position and results of operations.

13. Our insurance coverage may not be adequate to cover all losses or liabilities that we may incur in our business and operations.

Our operations are subject to various risks inherent in the IT industry as well as fire, theft, earthquake, flood, acts of terrorism and other force majeure events. We maintain a standard fire and burglary policy for various risks.

Notwithstanding the insurance coverage that we carry, the occurrence of an event that causes losses in excess of the limits specified in our policies, or losses arising from events not covered by insurance policies, could harm our financial condition and future results of operations. However, in some cases, we may not have obtained the required insurance coverage or such insurance policies may have lapsed. In addition, our insurance policies may not continue to be available on reasonable terms, at economically acceptable premiums, or at all. There can be no assurance that any claims filed will be honoured fully or timely under our insurance policies. Also, our financial condition may be affected to the extent we suffer any loss or damage that is not covered by insurance or which exceeds our insurance coverage.

14. Our risk management policies and procedures may not adequately address unidentified or unanticipated risks.

We are exposed to various forms of operations, legal and regulatory risks. We have established a risk management system consisting of an organisational framework, policies, procedures and risk management methods that we consider to be appropriate for our business operations, and we have continued to enhance these systems.

However, due to the inherent limitations in the design and implementation of such a system, including internal control environment, risk identification and evaluation, effectiveness of risk control, and information communication, our systems may not be adequate or effective in identifying or mitigating our risk exposure in all market environments or against all types of risks.

As we seek to expand the scope of our operations, we also face the risk that we will be unable to develop risk management policies and procedures that are properly designed to manage the risks associated with the growth of our existing businesses. Inability to develop and implement effective risk management policies may adversely affect our business, financial condition, results of operations and prospects.

15. We have entered into, and will continue to enter into, related party transactions. There is no assurance that our future related party transactions would be on terms favourable to us when compared to similar transactions with unrelated or third parties.

We have entered into and may, in the course of our business, continue to enter into transactions with related parties in the future. For further details in relation to our related party transactions, please refer to chapter titled "Financial Statements" beginning on page 113 of this Draft Letter of Offer. While we believe that all such transactions have been conducted on an arm length's basis and in the ordinary course of business, there can be no assurance that we could not have achieved more favourable commercial terms with other parties. Furthermore, it is likely that we may enter into related party transactions in the future and such transactions may potentially involve conflicts of interest which may be detrimental to our Company. Although in terms of the Companies Act, 2013, we are required to adhere to various compliance requirements such as obtaining prior approvals from our Audit Committee, Board and Shareholders for certain related party transactions. There can be no assurance that such transactions, individually or in the aggregate, will not have an adverse effect on our financial condition and results of operations.

16. Our funding requirements and proposed deployment of the Net Proceeds of the Issue are based on management estimates and have not been independently appraised, and may be subject to change based on various factors, some of which are beyond our control.

Our Company intends to use the Net Proceeds for the purposes described under section titled "Objects of the Issue" beginning on page 59 of this Draft Letter of Offer. Subject to this section, our management will have broad discretion on deployment of the Net Proceeds. Our funding requirements and the proposed deployment of the Net Proceeds of the Issue are based on management estimates, and our current business

plan, and have not been appraised by any bank or financial institution. This is based on current conditions and is subject to change in light of changes in external circumstances, costs, other financial condition or business strategies.

Further, the deployment of the Net Proceeds will be at the discretion of our Company and we cannot assure you that we will be able to monitor and report the deployment of the net proceeds in a manner similar to that of a monitoring agency, in the absence of a requirement for us to appoint one under the SEBI (ICDR) Regulations. We may have to revise our expenditure and funding requirements as a result of variations in costs, estimates, quotations or other external factors, which may not be within the control of our management. This may entail rescheduling, revising or cancelling planned expenditure and funding requirements at the discretion of our Board.

17. Our Promoters and Promoter Group hold Equity Shares and are, therefore, interested in our Company's performance other than reimbursement of expenses incurred or normal remuneration of benefits.

Our Promoters and Promoter Group, have interests in our Company other than to the extent of normal remuneration or benefits and reimbursement of expenses incurred. For details, please refer to section titled "Our Management" beginning on page 58 of this Draft Letter of Offer. There can be no assurance that our Promoters and Promoter Group will exercise their rights as shareholders to the benefit and best interest of our Company. Our Promoters and Promoter Group will continue to exercise significant control over us, including being able to control the composition of our Board and determine decisions requiring simple or special majority voting of shareholders, and our other shareholders may be unable to affect the outcome of such voting. Our Promoters and Promoter Group may take or block actions with respect to our business which may conflict with the best interests of the Company or that of minority shareholders.

18. Our Company has availed certain unsecured loans that may be recalled by the lenders at any time.

Our Company currently has availed unsecured loans of ₹ 1524.54 lakhs as on date which may be called by their lenders at any time. In the event that any lender seeks a repayment of any such loan, our Company would need to find alternative sources of financing, which may not be available on commercially reasonable terms, or at all. If we are unable to procure such financing, we may not have adequate working capital to undertake new projects or complete our ongoing projects. As a result, any such demand may adversely affect our business, cash flows, financial condition and results of operations.

19. Any increase in interest rates would have an adverse effect on our results of operations and will expose our Company to interest rate risks.

We are dependent upon the availability of equity, cash balances and debt financing to fund our operations and growth. Any fluctuations in interest rates may directly impact the interest costs of loans and, in particular, any increase in interest rates could adversely affect our results of operations. Furthermore, our indebtedness means that a material portion of our expected cash flow may be required to be dedicated to the payment of interest on our indebtedness, thereby reducing the funds available to us for use in our general business operations. If interest rates increase, our interest payments will increase and our ability to obtain additional debt facilities could be adversely affected with a concurrent adverse effect on our business, financial condition and results of operations.

20. We require to obtain, maintain and/or renew certain registrations, approvals, licenses and permission in ordinary course of our business, and if we fail to do so, in a timely manner or at all, we may be unable to fully or partially operate our businesses and our results of operations may be adversely affected.

We may require certain approvals, licenses, registrations and permissions for our operations. While, we believe we will be able to obtain, maintain and renew such approvals or permits as required, there can be no assurance that we can do so in the timeframes anticipated by us, or at all. If we fail to obtain, maintain or renew any of these approvals or permits in a timely manner or at all, our operations and expansion plans may be interrupted, which could adversely affect our growth strategy, business and results of operations. Furthermore, our approvals and permits are subject to numerous conditions, some of which are onerous and require us to make substantial expenditures. If we fail to comply or a regulator alleges that we have not complied with these conditions, our business and results of operations could be adversely affected.

21. *Employee misconduct, errors or fraud could expose us to business risks or losses that could adversely affect our business prospects, results of operations and financial condition.*

Employee misconduct, errors or frauds could expose us to business risks or losses, including regulatory sanctions, penalties and serious harm to our reputation. Such employee misconduct includes breach in security requirements, misappropriation of funds, hiding unauthorized activities, failure to observe our stringent operational standards and processes, and improper use of confidential information. It is not always possible to detect or deter such misconduct, and the precautions we take to prevent and detect such misconduct may not be effective. In addition, losses caused on account of employee misconduct or misappropriation of petty cash expenses and advances may not be recoverable, which we may result in write-off of such amounts and thereby adversely affecting our results of operations. Our employees may also commit errors that could subject us to claims and proceedings for alleged negligence, as well as regulatory actions in which case, our reputation, business prospects, results of operations and financial condition could be adversely affected.

22. *Our future funds requirements, in the form of fresh issue of capital or securities and / or loans taken by us, may be prejudicial to the interest of the shareholders depending upon the terms on which they are eventually raised.*

We may require additional capital from time to time depending on our business needs. Any fresh issue of shares or convertible securities would dilute the shareholding of the existing shareholders and such issuance may be done on terms and conditions, which may not be favorable to the then existing shareholders. If such funds are raised in the form of loans or debt, then it may substantially increase our interest burden and decrease our cash flows, thus prejudicially affecting our profitability and ability to pay dividends to our shareholders.

23. *Sale of Equity Shares by our Promoters or other significant shareholder(s) may adversely affect the trading price of the Equity Shares.*

Any instance of disinvestments of equity shares by our Promoters or by other significant shareholder(s) may significantly affect the trading price of our Equity Shares. Further, our market price may also be adversely affected even if there is a perception or belief that such sales of Equity Shares might occur.

24. *In the event there is any delay in the completion of the Issue, there would be a corresponding delay in the completion of the objects / schedule of implementation of this Issue which would in turn affect our revenues and results of operations.*

The funds that we receive would be utilized for the Objects of the Issue as has been stated in the Chapter “Objects of the Issue” on page no41of the Draft Letter of Offer. The proposed schedule of implementation of the objects of the Issue is based on our management’s estimates. If the schedule of implementation is delayed for any other reason whatsoever, including any delay in the completion of the Issue, we may have to revise our business plans resulting in unprecedented financial mismatch and this may adversely affect our revenues and results of operations.

25. *As the Equity Shares of our Company are listed on the BSE Limited, our Company is subject to certain obligations and reporting requirements under the SEBI (LODR) Regulations, 2015 and comply with other SEBI Regulations. Any non-compliances/delay in complying with such obligations and reporting requirements may render us liable to prosecution and/or penalties.*

The Equity Shares of our Company are listed on BSE Limited, therefore we are subject to the obligations and reporting requirements prescribed under the SEBI (LODR) Regulations, to the extent applicable, and have to adhere to and comply with other applicable Regulations framed by SEBI. Our Company endeavours to comply with all such obligations and reporting requirements, any non-compliance which might have been committed by us, may result into Stock Exchange and/or SEBI imposing penalties, issuing warnings and show cause notices against us and/or taking actions as provided under the SEBI Act and the rules and regulations made there under and applicable SEBI Circulars. Any such adverse regulatory action or development could affect our business reputation, divert management attention, and result in a material adverse effect on our business prospects and financial performance and on the trading price of the Equity Shares.

- 26. *We have not commissioned an industry report for the disclosures made in the section titled “Industry Overview” and made disclosures on the basis of the data available on the internet and such data has not been independently verified by us.***

We have neither commissioned an industry report, nor sought consent from the quoted website source for the disclosures which need to be made in the section titled —Industry Overview| beginning on page 50 of this Draft Letter of Offer. We have made disclosures in the said chapter on the basis of the relevant industry related data available online for which relevant consents have not been obtained. We have not independently verified such data. We cannot assure you that any assumptions made are correct or will not change and, accordingly, our position in the market may differ from that presented in this Draft Letter of Offer. Further, the industry data mentioned in this Draft Letter of Offer or sources from which the data has been collected are not recommendations to invest in our Company. Accordingly, investors should read the industry related disclosure in this Draft Letter of Offer in this context.

ISSUE SPECIFIC RISK

- 27. *SEBI has recently, by way of circulars dated January 22, 2020, May 6, 2020, January 19, 2021, April 22, 2021 and October 01, 2021 streamlined the process of rights issues. You should follow the instructions carefully, as stated in such SEBI circulars and in this Draft Letter of Offer.***

The concept of crediting Rights Entitlements into the demat accounts of the Eligible Equity Shareholders has recently been introduced by the SEBI. Accordingly, the process for such Rights Entitlements has been recently devised by capital market intermediaries. Eligible Equity Shareholders are encouraged to exercise caution, carefully follow the requirements as stated in the SEBI circulars dated January 22, 2020, May 6, 2020, January 19, 2021, April 22, 2021, and October 01, 2021, and ensure completion of all necessary steps in relation to providing/updating their demat account details in a timely manner. For details, see “*Terms of the Issue*” on page 92 of this Draft Letter of Offer.

In accordance with Regulation 77A of the SEBI ICDR Regulations read with the SEBI Rights Issue Circular, the credit of Rights Entitlements and Allotment of Rights Equity Shares shall be made in dematerialized form only. Prior to the Issue Opening Date, our Company shall credit the Rights Entitlements to (i) the demat accounts of the Eligible Equity Shareholders holding the Equity Shares in dematerialised form; and (ii) a demat suspense escrow account opened by our Company, for the Eligible Equity Shareholders which would comprise Rights Entitlements relating to (a) Equity Shares held in a demat suspense account pursuant to Regulation 39 of the SEBI Listing Regulations; or (b) Equity Shares held in the account of IEPF authority; or (c) the demat accounts of the Eligible Equity Shareholder which are frozen or details of which are unavailable with our Company or with the Registrar on the Record Date; or (d) credit of the Rights Entitlements returned/reversed/failed; or (e) the ownership of the Equity Shares currently under dispute, including any court proceedings.

- 28. *The Rights Entitlement of Eligible Equity Shareholders holding Equity Shares in physical form (“Physical Shareholders”) may lapse in case they fail to furnish the details of their demat account to the Registrar.***

In accordance with Regulation 77A of the SEBI ICDR Regulations read with the SEBI Circular SEBI/HO/CFD/DIL2/CIR/P/2020/13 dated January 22, 2020, the credit of Rights Entitlement and Allotment of Rights Equity Shares shall be made in dematerialised form only. Accordingly, the Rights Entitlements of the Physical Shareholders shall be credited in a suspense escrow demat account opened by our Company during the Issue Period. The Physical Shareholders are requested to furnish the details of their demat account to the Registrar not later than two Working Days prior to the Issue Closing Date to enable the credit of their Rights Entitlements in their demat accounts at least one day before the Issue Closing Date. The Rights Entitlements of the Physical Shareholders who do not furnish the details of their demat account to the Registrar not later than two Working Days prior to the Issue Closing Date, shall lapse. Further, pursuant to a press release dated December 3, 2018 issued by the SEBI, with effect from April 1, 2019, a transfer of listed Equity Shares cannot be processed unless the Equity Shares are held in dematerialized form (except in case of transmission or transposition of Equity Shares).

- 29. *Applicants to this Issue are not allowed to withdraw their Applications after the Issue Closing Date.***

Applicants in this Issue are not allowed to withdraw their Applications after the Issue Closing Date. The Allotment in this Issue and the credit of such Rights Equity Shares to the Applicant's demat account with its depository participant shall be completed within such period as prescribed under the applicable laws. There is no assurance, however, that material adverse changes in the international or national monetary, financial, political or economic conditions or other events in the nature of force majeure, material adverse changes in our business, results of operation, cash flows or financial condition, or other events affecting the Applicant's decision to invest in the Rights Equity Shares, would not arise between the Issue Closing Date and the date of Allotment in this Issue. Occurrence of any such events after the Issue Closing Date could also impact the market price of our Equity Shares. The Applicants shall not have the right to withdraw their applications in the event of any such occurrence. We cannot assure you that the market price of the Equity Shares will not decline below the Issue Price. To the extent the market price for the Equity Shares declines below the Issue Price after the Issue Closing Date, the shareholder will be required to purchase Equity Shares at a price that will be higher than the actual market price for the Equity Shares at that time. Should that occur, the shareholder will suffer an immediate unrealized loss as a result. We may complete the Allotment even if such events may limit the Applicants' ability to sell our Equity Shares after this Issue or cause the trading price of our Equity Shares to decline.

30. *Investors will be subject to market risks until the Equity Shares are credited to the investor's demat account are listed and permitted to trade.*

Investors can start trading our Equity Shares allotted to them only after they have been credited to an investor's demat account, are listed and permitted to trade. Since our Equity Shares are currently traded on the Stock Exchange, investors will be subject to market risk from the date they pay for our Equity Shares to the date when trading approval and listing approval are granted for the same. Further, there can be no assurance that our Equity Shares allocated to an investor will be credited to the investor's demat account or that trading in such Equity Shares will commence in a timely manner.

31. *Any further issuance of Equity Shares by Our Company or sales of Equity Shares by any significant shareholders may adversely affect the trading price of the Equity Shares.*

Any future issuance of Equity Shares by our Company could dilute the investors' shareholding. Any such future issuance of Equity Shares or sales of Equity Shares by any of our significant shareholders may also adversely affect the trading price of the Equity Shares, and could impact our ability to raise capital through an offering of securities. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of the Equity Shares.

32. *There are restrictions on daily movements in the price of the Equity Shares, which may adversely affect a shareholder's ability to sell, or the price at which it can sell, the Equity Shares at a particular point in time.*

The price of the Equity Shares will be subject to a daily circuit breaker imposed by all stock exchanges in India which does not allow transactions beyond a certain level of volatility in the price of the Equity Shares. This circuit breaker operates independently of the index-based market-wide circuit breakers generally imposed by the SEBI on Indian stock exchanges. The percentage limit on our circuit breaker is set by the stock exchanges based on the historical volatility in the price and trading volume of the Equity Shares. The stock exchanges do not inform us of the percentage limit of the circuit breaker from time to time, and may change it without our knowledge. This circuit breaker effectively limits upward and downward movements in the price of the Equity Shares. As a result, shareholders' ability to sell the Equity Shares, or the price at which they can sell the Equity Shares, may be adversely affected at a particular point in time.

33. *We may decide not to proceed with this Issue at any time before allotment. If we decide not to proceed with the Issue after the Issue Opening Date but before Allotment, the refund of Application amounts deposited will be subject to us complying with our obligations under applicable laws.*

The Company, in consultation with the Lead Manager, reserves the right not to proceed with this Issue at any time before the Allotment. If we withdraw the Issue after the Issue Opening Date, we will be required to refund all Application amounts deposited within 4 days of the Issue Closing Date. We shall be required to pay interest at the rate of 15% per annum on the Application amounts received if refund orders are not

dispatched within 4 days from the Issue Closing Date. Notwithstanding the foregoing, the Issue is also subject to obtaining (i) the final listing and trading approvals of the Stock Exchange, which the Company shall apply for after Allotment and (ii) the final RoC approval.

34. *Our ability to pay dividends in the future may be affected by any material adverse effect on our future earnings, financial condition or cash flows.*

Our ability to pay dividends in future will depend on our earnings, financial condition and capital requirements. In the past, we have not made dividend payments to the Shareholders of our Company. The Company may decide to retain all future earnings, if any, for use in the operations and expansion of the business. In such situation, the Company may not declare dividends in the foreseeable future. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board and will depend on factors that our Board deems relevant, including among others, our future earnings, financial condition, cash requirements, business prospects and any other financing arrangements. We cannot state with any certainty whether we will be able to pay dividends in the future. Accordingly, realization of a gain on Shareholders' investments will depend on the appreciation of the price of the Equity Shares. There is no guarantee that our Equity Shares will appreciate in value.

35. *Investors may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.*

Under current Indian tax laws and regulations, capital gains arising from the sale of equity shares in an Indian company are generally taxable in India. Any gain realized on the sale of listed equity shares on a stock exchange held for more than 12 months will not be subject to capital gains tax in India if Securities Transaction Tax (STT) has been paid on the transaction. STT will be levied on and collected by a domestic stock exchange on which the equity shares are sold. Any gain realized on the sale of equity shares held for more than 12 months to an Indian resident, which are sold other than on a recognized stock exchange and on which no STT has been paid, will be subject to long term capital gains tax in India. Further, any gain realized on the sale of listed equity shares held for a period of 12 months or less will be subject to short term capital gains tax in India. Capital gains arising from the sale of the Equity Shares will be exempt from taxation in India in cases where the exemption from taxation in India is provided under a treaty between India and the country of which the seller is resident. Generally, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdiction on a gain upon the sale of the Equity Shares. In addition, changes in the terms of tax treaties or in their interpretation, as a result of renegotiations or otherwise, may affect the tax treatment of capital gains arising from a sale of Equity Shares.

EXTERNAL RISK FACTORS

36. *The Companies Act, 2013 has effected significant changes to the existing Indian company law framework, which may subject us to higher compliance requirements and increase our compliance costs.*

The Companies Act, 2013 introduced certain additional requirements which do not have corresponding equivalents under the Companies Act, 1956. Accordingly, we may face challenges in interpreting and complying with such provisions due to limited jurisprudence on them. In the event, our interpretation of such provisions of the Companies Act, 2013 differs from, or contradicts with, any judicial pronouncements or clarifications issued by the Government in the future, we may face regulatory actions or we may be required to undertake remedial steps. Additionally, some of the provisions of the Companies Act, 2013 overlap with other existing laws and regulations (such as the corporate governance norms and insider trading regulations). We may face difficulties in complying with any such overlapping requirements. Further, we cannot currently determine the impact of provisions of the Companies Act, 2013, which are yet to come in force. Any increase in our compliance requirements or in our compliance costs may have an adverse effect on our business and results of operations.

37. *Changing laws, rules and regulations and legal uncertainties, including adverse application of corporate and tax laws, may adversely affect our business, results of operations, financial condition and prospects.*

The regulatory and policy environment in which we operate is evolving and subject to change. Such changes, may adversely affect our business, results of operations, financial condition and prospects, to the

extent that we are unable to suitably respond to and comply with any such changes in applicable law and policy.

38. *Civil disturbances, extremities of weather, regional conflicts and other political instability may have adverse effects on our operations and financial performance.*

Certain events that are beyond our control such as earthquake, fire, floods and similar natural calamities may cause interruption in the business undertaken by us. Our operations and financial results and the market price and liquidity of our equity shares may be affected by changes in Indian Government policy or taxation or social, ethnic, political, economic or other adverse developments in or affecting India.

39. *Terrorist attacks, civil unrest and other acts of violence or war involving India and other countries could adversely affect the financial markets and our business.*

Terrorist attacks and other acts of violence or war may negatively affect the Indian markets on which our Equity Shares will trade and also adversely affect the worldwide financial markets. These acts may also result in a loss of business confidence, impede travel and other services and ultimately adversely affect our business. In addition, any deterioration in relations between India and Pakistan might result in investor concern about stability in the region, which could adversely affect the price of our Equity Shares.

India has also witnessed civil disturbances in recent years and it is possible that future civil unrest as well as other adverse social, economic and political events in India could have a negative impact on the value of share prices generally as well as the price of our Equity Shares. Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse impact on our business and the price of our Equity Shares.

40. *Instability in financial markets could materially and adversely affect our results of operations and financial condition.*

The Indian economy and financial markets are significantly influenced by worldwide economic, financial and market conditions. Any financial turmoil, especially in the United States of America or Europe, may have a negative impact on the Indian economy. Although economic conditions differ in each country, investors' reactions to any significant developments in one country can have adverse effects on the financial and market conditions in other countries. A loss in investor confidence in the financial systems, particularly in other emerging markets, may cause increased volatility in Indian financial markets.

The global financial turmoil, an outcome of the sub-prime mortgage crisis which originated in the United States of America, led to a loss of investor confidence in worldwide financial markets. Indian financial markets have also experienced the contagion effect of the global financial turmoil, evident from the sharp decline in SENSEX, BSE's benchmark index. Any prolonged financial crisis may have an adverse impact on the Indian economy and us, thereby resulting in a material and adverse effect on our business, operations, financial condition, profitability and price of our Equity Shares.

41. *Any downgrading of India's debt rating by a domestic or international rating agency could adversely affect our Company's business.*

Any adverse revisions to India's debt ratings by domestic or international rating agencies may adversely affect our Company's ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing is available. This could harm our Company's business and financial performance and ability to obtain financing for capital expenditures.

42. *Conditions in the Indian securities market and stock exchanges may affect the price and liquidity of our Equity Shares.*

Indian stock exchanges, which are smaller and more volatile than stock markets in developed economies, have in the past, experienced problems which have affected the prices and liquidity of listed securities of Indian companies. These problems include temporary exchange closures to manage extreme market volatility, broker defaults, settlement delays and strikes by brokers. In addition, the governing bodies of the Indian stock exchanges have from time to time restricted securities from trading, limited price movements

and restricted margin requirements. Further, disputes have occurred on occasion between listed companies and the Indian stock exchanges and other regulatory bodies that, in some cases, there had been a negative effect on market sentiment. OVERVIEW OF THE GLOBAL AND INDIAN ECONOMY

GLOBAL ECONOMIC OUTLOOK

The global economy is experiencing a number of turbulent challenges. Inflation higher than seen in several decades, tightening financial conditions in most regions, Russia’s invasion of Ukraine, and the lingering COVID-19 pandemic all weigh heavily on the outlook. Normalization of monetary and fiscal policies that delivered unprecedented support during the pandemic is cooling demand as policymakers aim to lower inflation back to target. But a growing share of economies are in a growth slowdown or outright contraction. The global economy’s future health rests critically on the successful calibration of monetary policy, the course of the war in Ukraine, and the possibility of further pandemic-related supply-side disruptions, for example, in China.

Global growth is forecast to slow from 6.0 percent in 2021 to 3.2 percent in 2022 and 2.7 percent in 2023. This is the weakest growth profile since 2001 except for the global financial crisis and the acute phase of the COVID-19 pandemic and reflects significant slowdowns for the largest economies: a US GDP contraction in the first half of 2022, a euro area contraction in the second half of 2022, and prolonged COVID-19 outbreaks and lockdowns in China with a growing property sector crisis. About a third of the world economy faces two consecutive quarters of negative growth. Global inflation is fore-cast to rise from 4.7 percent in 2021 to 8.8 percent in 2022 but to decline to 6.5 percent in 2023 and to 4.1 percent by 2024. Upside inflation surprises have been most widespread among advanced economies, with greater variability in emerging market and developing economies.

OVERVIEW OF GLOBAL PHARMACEUTICALS SECTOR

The global pharmaceutical manufacturing market size was valued at USD 405.52 billion in 2020 and is expected to grow at a compound annual growth rate (CAGR) of 11.34% from 2021 to 2028. The pharmaceutical landscape has undergone a massive transformation with the emergence of new technologies, cost-effective, and more efficient manufacturing approaches. In addition, increasing investment flow in this space has impacted the market growth positively. Manufacturing floor downtime and the production of product waste are reduced by the implementation of robotic technology and Artificial Intelligence (AI). In addition, single-use disposable solutions have gained momentum in this industry and have replaced conventional open transfer manufacturing techniques. Furthermore, the paradigm shift towards integrated, smart, and data-rich paperless operations has resulted in error-free and precise production. Such ongoing developments have propelled drug manufacturing.

Constant progress in the field of personalized medicines has opened up numerous possibilities to target different health maladies and allowed the development of patient-centric models. This progress results in a shift from large batches to smaller batches for the development of complex medicines and autologous patient-centric treatments. This has also encouraged the manufacturers to redesign their supply chain to better align with the patient-centric health care system.

In addition to China, India joins another BRIC country, Brazil, which rises to number seven in the global market in 2025, up from number eight in 2021. China retains its position as the number two ranked market. Japan, the EU 4 (France, Germany, Italy, and Spain), and the UK round out the other top 10 pharma markets both in 2021 and projected for 2025

OVERVIEW OF GLOBAL PHARMACEUTICALS INDUSTRY

The global active pharmaceutical ingredients market size is expected to grow from \$204.11 billion in 2022 to \$218.40 billion in 2023 at a compound annual growth rate (CAGR) of 7.0%. The Russia-Ukraine war disrupted the chances of global economic recovery from the COVID-19 pandemic, at least in the short term. The war between these two countries has led to economic sanctions on multiple countries, a surge in commodity prices, and supply chain disruptions, causing inflation across goods and services and affecting many markets across the globe. The active pharmaceutical ingredients market size is expected to grow to \$275.36 billion in 2027 at a CAGR of 6.0%.

The active pharmaceutical ingredient market consists of sales of active pharmaceutical ingredients that are used in final pharmaceutical products such as drug products (tablet, pill, cream, or injectable) to deliver a desired effect. Values in this market are 'factory gate' values, that is the value of goods sold by the manufacturers or creators of the goods, whether to other entities (including downstream manufacturers, wholesalers, distributors, and retailers) or directly to end customers. The value of goods in this market includes related services sold by the creators of the goods.

OVERVIEW OF INDIAN PHARMACEUTICALS INDUSTRY

LEADING PHARMA PRODUCER

India is the largest provider of generic drugs globally and is known for its affordable vaccines and generic medications. The Indian Pharmaceutical industry is currently ranked third in pharmaceutical production by volume after evolving over time into a thriving industry growing at a CAGR of 9.43% since the past nine years. Generic drugs, over-the-counter medications, bulk drugs, vaccines, contract research & manufacturing, biosimilars, and biologics are some of the major segments of the Indian pharma industry. India has the most number of pharmaceutical manufacturing facilities that are in compliance with the US Food and Drug Administration (USFDA) and has 500 API producers that make for around 8% of the worldwide API market.

Indian pharmaceutical sector supplies over 50% of global demand for various vaccines, 40% of generic demand in the US and 25% of all medicine in the UK. The domestic pharmaceutical industry includes a network of 3,000 drug companies and ~10,500 manufacturing units. India enjoys an important position in the global pharmaceuticals sector. The country also has a large pool of scientists and engineers with a potential to steer the industry ahead to greater heights. Presently, over 80% of the antiretroviral drugs used globally to combat AIDS (Acquired Immune Deficiency Syndrome) are supplied by Indian pharmaceutical firms. India is rightfully known as the "pharmacy of the world" due to the low cost and high quality of its medicines.

- India could restart deliveries of COVID-19 shots to global vaccine-sharing platform COVAX in November-December 2021 for the first time since April 2021. The World Health Organization (WHO), which co-leads COVAX, has been pushing India to resume supplies for the programme, particularly after it sent ~4 million doses to neighbours and allies in October 2021.

- In November 2021, PM Mr. Narendra Modi inaugurated the first Global Innovation Summit of the pharmaceuticals sector. The summit will have 12 sessions and over 40 national and international speakers deliberating on a range of subjects including regulatory environment, funding for innovation, industry-academia collaboration and innovation infrastructure.
- In August 2021, Union Health Minister, Mr. Mansukh Mandaviya announced that an additional number of pharmaceutical companies in India are expected to commence manufacturing of anti-coronavirus vaccines by October-November 2021. This move is expected to further boost the vaccination drive across the country.
- In June 2021, Finance Minister Ms. Nirmala Sitharaman announced an additional outlay of Rs. 197,000 crore (US \$26,578.3 million) that will be utilised over five years for the pharmaceutical PLI scheme in 13 key sectors such as active pharmaceutical ingredients, drug intermediaries and key starting materials.

- In May 2021, under Atmanirbhar Bharat 3.0, Mission COVID Suraksha was announced by the Government of India to accelerate development and production of indigenous COVID vaccines. To augment the capacity of indigenous production of Covaxin under the mission, the Department of Biotechnology, Government of India, provided financial support in the form of a grant to vaccine manufacturing facilities for enhanced production capacities, which is expected to reach >10 crore doses per month by September 2021.

ROAD AHEAD

The pharmaceutical industry in India is a significant part of the nation's foreign trade and offers lucrative potential for investors. Millions of people around the world receive affordable and inexpensive generic medications from India, which also runs a sizable number of plants that adhere to Good Manufacturing Practices (GMP) standards set by the World Health Organization (WHO) and the United States Food and Drug Administration (USFDA). Among nations that produce pharmaceuticals, India has long held the top spot. Medicine spending in India is projected to grow 9-12% over the next five years, leading India to become one of the top 10 countries in terms of medicine spending. Going forward, better growth in domestic sales would also depend on the ability of companies to align their product portfolio towards chronic therapies for diseases such as such as cardiovascular, anti-diabetes, anti-depressants and anti-cancers, which are on the rise. The Indian Government has taken many steps to reduce costs and bring down healthcare expenses. The National Health Protection Scheme, which aims to offer universal healthcare, the ageing population, the rise in chronic diseases, and other government programmes, including the opening of pharmacies that offer inexpensive generic medications, should all contribute to boost the Indian pharmaceutical industry. Speedy introduction of generic drugs into the market has remained in focus and is expected to benefit the Indian pharmaceutical companies. In addition, the thrust on rural health programmes, lifesaving drugs and preventive vaccines also augurs well for the pharmaceutical companies.

RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991, of the Government of India and FEMA. While the Industrial Policy, 1991, of the Government of India, prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise way such investment may be made. The Union Cabinet, as provided in the Cabinet Press Release dated May 24, 2017, has given its approval for phasing out the FIPB. Under the Industrial Policy, 1991, unless specifically restricted, foreign investment is freely permitted in all sectors of the Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. Accordingly, the process for foreign direct investment (“FDI”) and approval from the Government of India will now be handled by the concerned ministries or departments, in consultation with the Department for Promotion of Industry and Internal Trade, Ministry of Commerce and Industry, Government of India (formerly known as the Department of Industrial Policy and Promotion) (“DPIIT”), Ministry of Finance, Department of Economic Affairs, FIPB section, through a memorandum dated June 5, 2017, has notified the specific ministries handling relevant sectors.

The Government has, from time to time, made policy pronouncements on FDI through press notes and press releases. The DPIIT issued the Consolidated FDI Policy Circular of 2020 (“FDI Circular”) by way of circular bearing number DPIIT file number 5(2)/2020-FDI Policy dated October 15, 2020, which with effect from October 15, 2020, consolidates and supersedes all previous press notes, press releases and clarifications on FDI issued by the DPIIT that were in force and effect as on October 15, 2020. The Government of India has from time to time made policy pronouncements on FDI through press notes and press releases which are notified by RBI as amendments to FEMA. In case of any conflict between FEMA and such policy pronouncements, FEMA prevails.

The transfer of shares between an Indian resident and a non-resident does not require the prior approval of the RBI, provided that (i) the activities of the investee company falls under the automatic route as provided in the FDI Policy and FEMA and transfer does not attract the provisions of the SEBI Takeover Regulations; (ii) the nonresident shareholding is within the sectoral limits under the FDI Policy; and (iii) the pricing is in accordance with the guidelines prescribed by SEBI and RBI.
